¹ Annualized

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. The performance shown reflects fee waivers/reimbursements in effect; without these waivers, performance would have been lower. Total returns are based on net change in NAV with reinvestment of all dividends. For performance current to the most recent month-end, please call (888) 201-5799. The Fund charges a 1% redemption fee if shares are redeemed within 60 days of purchase. The Russell 1000 Value Index is an unmanaged market index and should not be considered indicative of any Quality Dividend Fund investment. It is not possible to directly invest in an index. Unlike a mutual fund, the performance of an index assumes no taxes, transaction costs, management fees, or other expenses.

Risks

Mutual fund investing involves risk, including possible loss of principal. Although the Fund will invest primarily in income-producing equities, the Fund cannot guarantee any particular level of distributions. Companies that have paid regular dividends to shareholders may decrease or eliminate dividend payments in the future. A fund pursuing a dividend-oriented investment strategy may at times underperform other funds that invest more broadly or that have different investment styles.

The S&P 500 Index is an unmanaged index of equity prices and is representative of a broader market and range of securities than is found in the Fund's portfolio.

The Morningstar Large Value Category consists of Funds that invest primarily in big U.S. companies that are less expensive or growing more slowly than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large-cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow).

The Russell 1000 Value Index consists of approximately 1,000 of the largest companies in the U.S. equity markets and measures how U.S. stocks in the equity value segment perform.

Foreign securities potentially entail special risks such as less liquid markets; political and economic instability; lax regulation; and adverse fluctuations in currency exchange rates.

Real estate investing is subject to special risks, including tenant default, declining occupancy rates, adverse changes in environmental and zoning regulations, and falling property values and rents due to deteriorating local or national economic conditions. REIT securities listed on a securities exchange may be subject to abrupt or erratic price movements because of interest rate changes and other factors. Non-listed REIT securities may lack sufficient liquidity to enable the Fund to sell them at an advantageous time or to minimize a loss. Distributions from REITs may include a return of capital. A REIT that does not qualify as a REIT under the Internal Revenue Code ("IRC") will pay taxes on its earnings, which will reduce the dividends paid by the REIT to the Fund. Some REITs are highly leveraged, which may increase the risk of loss.

MLPs are partnerships which are publicly traded and listed on a national securities exchange. MLPs are interest rate-sensitive investments that may trade in lower volumes and be subject to abrupt or erratic price movements and may involve less control by outside investors and potential conflicts of interest among an MLP and its general partner. The IRC treats distributions from an MLP as non-taxable return of capital until the value of the distributions exceeds a partner's basis in partnership interests, at which point the distributions are taxable. MLPs do not pay U.S. federal income tax at the partnership level, but an adverse change in tax laws could result in MLPs being treated as corporations for federal income tax purposes, which would reduce or eliminate an MLP's tax deductions. MLPs primarily are engaged in energy and natural resource sectors, which makes them sensitive to negative developments in those sectors.

Investors should consider the investment objective, risks, charges, and expenses of the Quality Dividend Fund carefully before investing. A prospectus with this and other information about the Fund may be obtained by calling (888) 201-5799. Read the prospectus carefully before investing. The investment return and principal value of an investment will fluctuate, so an investor's shares, when redeemed, may be worth more or less than their original cost.

Quality Dividend Fund is distributed by Foreside Funds Distributors LLC, not an affiliate of EquityCompass.

*Total assets combine both Assets Under Management and Assets Under Advisement as of June 30, 2020. Assets Under Management represents the aggregate fair value of all discretionary and non-discretionary assets, including fee paying and non-fee paying portfolios. Assets Under Advisement represent advisory-only assets where the firm provides a model portfolio and does not have trading authority over the assets.
