FUNDVANTAGE TRUST

STATEMENT OF ADDITIONAL INFORMATION

September 1, 2019

This Statement of Additional Information (“SAI”) provides information about the Quality Dividend Fund (the “Fund”) in addition to the information that is contained in the Fund’s current prospectus dated September 1, 2019, as amended or supplemented from time to time (the “Prospectus”). The Fund is a series of FundVantage Trust (the “Trust”).

This SAI is not a prospectus. It should be read in conjunction with the Fund’s Prospectus. This SAI is incorporated by reference in its entirety into the Prospectus. The Fund’s audited financial statements and the notes thereto, which are included in the Fund’s Annual Report to shareholders dated April 30, 2019, are incorporated into this SAI by reference. A copy of the Prospectus and annual report to shareholders may be obtained without charge, upon request, by writing to the Fund at 4400 Computer Drive, Westborough, MA 01581-1722 or by calling the Fund at (888) 201-5799 or on the Fund’s website at www.equitycompass.com.

GENERAL INFORMATION

The Trust was organized as a Delaware statutory trust on August 28, 2006. The Trust is a series trust authorized to issue separate series or classes of shares of beneficial interest. The Trust has established the Fund as a separate series of the Trust. The Fund issues Class A, Class C and Institutional Class shares. The Fund is a diversified, open-end management investment company registered under the Investment Company Act of 1940, as amended (the "1940 Act"). EquityCompass Investment Management, LLC ("EquityCompass" or the "Adviser"), serves as investment adviser to the Fund.

INVESTMENT POLICIES

The following supplements the information contained in the Prospectus concerning the investment objective and policies of the Fund.

The Fund is a diversified fund under the Investment Company Act of 1940, as amended (the "1940 Act"). In order to qualify as a diversified fund, the 1940 Act requires that at least 75% of the value of the Fund's total assets be represented by cash and cash items (including receivables), Government securities, securities of other investment companies and other securities that for the purpose of this calculation are limited in respect to any one issuer to an amount not greater than 5% of the value of the Fund's total assets and no more than 10% of the outstanding voting securities or any single issuer.

The Adviser, subject to the general oversight of the Trust's Board of Trustees, has overall responsibility for directing the investments of the Fund in accordance with its investment objective, policies and limitations.

BANK OBLIGATIONS. Bank obligations in which the Fund may invest include certificates of deposit, bankers' acceptances and fixed time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument on maturity. Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor but may be subject to early withdrawal penalties which vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits. The Fund will not invest in fixed time deposits which: (1) are not subject to prepayment; or (2) provide for withdrawal penalties upon prepayment (other than overnight deposits) if, in the aggregate, more than 15% of its net assets would be invested in such deposits, repurchase agreements maturing in more than seven days and other illiquid assets.

Obligations of foreign banks involve somewhat different investment risks than those affecting obligations of United States banks, including the possibilities that their liquidity could be impaired because of future political and economic developments, that their obligations may be less marketable than comparable obligations of United States banks, that a foreign jurisdiction might impose withholding taxes on interest income payable on those obligations, that foreign deposits may be seized or nationalized, that foreign governmental restrictions such as exchange controls may be adopted which might adversely affect the payment of principal and interest on those obligations and that the selection of those obligations may be more difficult because there may be less publicly available information concerning foreign banks or the accounting, auditing and financial reporting standards, practices and requirements applicable to foreign banks may differ from those applicable to United States banks. Foreign banks are not generally subject to examination by any U.S. Government agency or instrumentality.

- **BANKERS' ACCEPTANCES.** Bankers' acceptances are credit instruments evidencing the obligation of a bank to pay a draft that has been drawn on it by a customer. These instruments reflect the obligation of both the bank and the drawer to pay the face amount of the instrument upon maturity.
- **CERTIFICATES OF DEPOSIT.** Certificates of deposit are certificates evidencing the indebtedness of a commercial bank to repay funds deposited with it for a definite period of time (usually from 14 days to one year) at a stated or variable interest rate. Variable rate certificates of deposit provide that the interest rate will fluctuate on designated dates based on changes in a designated base rate (such as the composite rate for certificates of deposit established by the Federal Reserve Bank of New York).
- **TIME DEPOSITS.** Time deposits are bank deposits for fixed periods of time. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties which may vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third party, although there is no market for such deposits

BORROWING. The Fund may borrow money to the extent permitted under the 1940 Act, and as interpreted, modified or otherwise permitted by regulatory authority having jurisdiction, from time to time. This means that, in general, the Fund may borrow money from banks for any purpose on a secured basis in an amount up to 33-1/3% of its total assets. The Fund may also borrow money for temporary administrative purposes on an unsecured basis in an amount not to exceed 5% of its total assets.

Specifically, provisions of the 1940 Act require the Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of the Fund's total assets made for temporary administrative purposes. Any borrowings for temporary administrative purposes in excess of 5% of the Fund's total assets must maintain continuous asset coverage. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three days to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time.

As noted below, the Fund also may enter into certain transactions, including reverse repurchase agreements, mortgage dollar rolls and sale-buybacks, that can be viewed as constituting a form of borrowing or financing transaction by the Fund. To the extent the Fund covers its commitment under a reverse repurchase agreement (or economically similar transaction) by the segregation or "earmarking" of assets determined in accordance with procedures adopted by the Board of Trustees, equal in value to the amount of the Fund's commitment to repurchase, such an agreement will not be considered a "senior security" by the Fund and therefore will not be subject to the 300% asset coverage requirement otherwise applicable to borrowings by the Fund. Borrowing will tend to exaggerate the effect on net asset value ("NAV") of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest costs which may or may not be recovered by appreciation of the securities purchased. The Fund also may be required to maintain minimum average balances in connection with such borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

COMMERCIAL PAPER. The Fund may invest in commercial paper. Commercial paper consists of short-term (up to 270 days) unsecured promissory notes issued by corporations and other entities in order to finance their current operations.

COMMON STOCK. Common stock represents an equity (ownership) interest in a company or other entity. This ownership interest often gives the Fund the right to vote on measures affecting the company's organization and operations. Although common stocks generally have had a history of long-term growth in value, their prices are often volatile in the short-term and can be influenced by both general market risk and specific corporate risks. Accordingly, the Fund can lose money through its stock investments.

CONVERTIBLE SECURITIES. The Fund may invest in convertible securities, which may offer higher income than the common stocks into which they are convertible. A convertible security is a bond, debenture, note, preferred stock, or other security that entitles the holder to acquire common stock or other equity securities of the same or a different issuer. A convertible security generally entitles the holder to receive interest paid or accrued until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities have characteristics similar to non-convertible debt or preferred securities, as applicable. Convertible securities are subordinate in rank to any senior debt obligations of the issuer, and, therefore, an issuer's convertible securities entail more risk than its debt obligations. Convertible securities generally offer lower interest or dividend yields than non-convertible debt securities of similar credit quality because of the potential for capital appreciation. In addition, convertible securities are often lower-rated securities. Convertible securities rank senior to common stock in a corporation's capital structure and, therefore, generally entail less risk than the corporation's common stock, although the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security.

Because of the conversion feature, the price of the convertible security will normally fluctuate in some proportion to changes in the price of the underlying asset, and as such is subject to risks relating to the activities of the issuer and/or general market and economic conditions. The income component of a convertible security may tend to cushion the security against declines in the price of the underlying asset. However, the income component of convertible securities causes fluctuations based upon changes in interest rates and the credit quality of the issuer.

If the convertible security's "conversion value," which is the market value of the underlying common stock that would be obtained upon the conversion of the convertible security, is substantially below the "investment value," which is the value of a convertible security viewed without regard to its conversion feature (i.e., strictly on the basis of its yield), the price of the convertible security is governed principally by its investment value. If the conversion value of a convertible security increases to a point that approximates or exceeds its investment value, the value of the security will be principally influenced by its conversion value. A convertible security will sell at a premium over its conversion value to the extent investors place value on the right to acquire the underlying common stock while holding an income-producing security.

A convertible security may be subject to redemption at the option of the issuer at a predetermined price. If a convertible security held by the Fund is called for redemption, the Fund would be required to permit the issuer to redeem the security and convert it to underlying common stock, or would sell the convertible security to a third party, which may have an adverse effect on the Fund's ability to achieve its investment objective. The Fund generally would invest in convertible securities for their favorable price characteristics and total return potential and would normally not exercise an option to convert unless the security is called or conversion is forced.

CORPORATE DEBT SECURITIES. The Fund's investments in U.S. dollar or foreign currency-denominated corporate debt securities of domestic or foreign issuers are limited to corporate debt securities (corporate bonds, debentures, notes and other similar corporate debt instruments, including convertible securities) which meet the minimum ratings criteria set forth for the Fund, or, if unrated, are in the Adviser's opinion comparable in quality to corporate debt securities in which the Fund may invest.

Corporate income-producing securities may include forms of preferred or preference stock. The rate of interest on a corporate debt security may be fixed, floating or variable, and may vary inversely with respect to a reference rate. The rate of return or return of principal on some debt obligations may be linked or indexed to the level of exchange rates between the U.S. dollar and a foreign currency or currencies. Debt securities may be acquired with warrants attached.

Securities rated Baa and BBB are the lowest which are considered "investment grade" obligations. Moody's Investors Service, Inc. ("Moody's") describes securities rated Baa as "subject to moderate credit risk. They are considered medium-grade and as such may possess certain speculative characteristics." Standard & Poor's Financial Services LLC ("S&P") describes securities rated BBB as "regarded as having adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation." For securities rated BBB, Fitch Ratings Ltd. ("Fitch") states that "... expectations of default risk are currently low... capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity." For a discussion of securities rated below-investment grade, see "Below-Investment Grade Securities" below.

CYBER SECURITY. The Fund and its service providers are susceptible to operational and information security risks due to cyber security incidents. In general, cyber security incidents can result from deliberate attacks or unintentional events. Cyber security attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks also may be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make services unavailable to intended users). Cyber security incidents affecting the Adviser, Transfer Agent or Custodian or other service providers such as financial intermediaries have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, including by interference with the Fund's ability to calculate its NAV; impediments to trading for the Fund's portfolio; the inability of fund shareholders to transact business with the Fund; violations of applicable privacy, data security or other laws; regulatory fines and penalties; reputational damage; reimbursement or other compensation or remediation costs; legal fees; or additional compliance costs. Similar adverse consequences could result from cyber security incidents affecting issuers of securities in which the Fund invests, counterparties with which the Fund engages in transactions, governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers, insurance companies and other financial institutions and other parties. While information risk management systems and business continuity plans have been developed which are designed to reduce the risks associated with cyber security, there are inherent limitations in any cyber security risk management systems or business continuity plans, including the possibility that certain risks have not been identified.

DEBT SECURITIES. Debt securities represent money borrowed that obligates the issuer (e.g., a corporation, municipality, government, government agency) to repay the borrowed amount at maturity (when the obligation is due and payable) and usually to pay the holder interest at specific times.

DEPOSITARY RECEIPTS. American Depositary Receipts ("ADRs") as well as other "hybrid" forms of ADRs, including European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs"), are certificates evidencing ownership of shares of a foreign issuer. These certificates are issued by depository banks and generally trade on an established market in the United States or elsewhere. The underlying shares are held in trust by a custodian bank or similar financial institution. The depository bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends interest and shareholder information regarding corporate actions. ADRs may be available through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the security underlying the receipt and a depository. An unsponsored facility may be established by a depository without participation by the issuer of the underlying security. Holders of unsponsored depository receipts generally bear all the costs of the unsponsored facility. The depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities. ADRs are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, ADRs continue to be subject to many of the risks associated with investing directly in foreign securities. These risks include foreign exchange risk as well as the political and economic risks of the underlying issuer's country.

DERIVATIVE INSTRUMENTS. In pursuing its investment objective, the Fund may, to the extent permitted by its investment objective and policies, purchase and sell (write) both put options and call options on securities, swap agreements, securities indexes, commodity indexes and foreign currencies, and enter into interest rate, index and commodity futures contracts and purchase and sell options on such futures contracts (“futures options”) for hedging purposes, to seek to replicate the composition and performance of a particular index, or as part of its overall investment strategies. The Fund also may purchase and sell foreign currency options for purposes of increasing exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one country to another. The Fund may also enter into swap agreements with respect to interest rates, commodities and indexes of securities or commodities. The Fund may invest in structured notes. If other types of financial instruments, including other types of options, futures contracts, or futures options are traded in the future, the Fund may also use those instruments, provided that such instruments are consistent with the Fund’s investment objective.

The value of some derivative instruments in which the Fund invests may be particularly sensitive to changes in prevailing interest rates, and, like the other investments of the Fund, the ability of the Fund to successfully utilize these instruments may depend in part upon the ability of the Adviser to forecast interest rates and other economic factors correctly. If the Adviser incorrectly forecasts such factors and has taken positions in derivative instruments contrary to prevailing market trends, the Fund could be exposed to the risk of loss.

The Fund might not employ any of the strategies described below, and no assurance can be given that any strategy used will succeed. If the Adviser incorrectly forecasts interest rates, market values or other economic factors in using a derivatives strategy for the Fund, the Fund might have been in a better position if it had not entered into the transaction at all. Also, suitable derivative transactions may not be available in all circumstances. The use of these strategies involves certain special risks, including a possible imperfect correlation, or even no correlation, between price movements of derivative instruments and price movements of related investments. While some strategies involving derivative instruments can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favorable price movements in related investments or otherwise, due to the possible inability of the Fund to purchase or sell a portfolio security at a time that otherwise would be favorable, the possible need to sell a portfolio security at a disadvantageous time because the Fund is required to maintain asset coverage, offsetting positions in connection with transactions in derivative instruments or the possible inability of the Fund to close out or to liquidate its derivatives positions. In addition, the Fund’s use of such instruments may cause the Fund to realize higher amounts of short-term capital gains (generally taxed at ordinary income tax rates) than if it had not used such instruments. If the Fund gains exposure to an asset class using derivative instruments backed by a collateral portfolio of fixed income instruments, changes in the value of the fixed income instruments may result in greater or lesser exposure to that asset class than would have resulted from a direct investment in securities comprising that asset class.

Options on Securities and Indexes. The Fund may, to the extent specified herein or in the Prospectus, purchase and sell both put and call options on fixed income or other securities or indexes in standardized contracts traded on foreign or domestic securities exchanges, boards of trade, or similar entities, or quoted on the National Association of Securities Dealers Automatic Quotation System (“NASDAQ”) or on an over-the-counter market, and agreements, sometimes called cash puts, which may accompany the purchase of a new issue of bonds from a dealer.

An option on a security (or index) is a contract that gives the holder of the option, in return for a premium, the right to buy from (in the case of a call) or sell to (in the case of a put) the writer of the option the security underlying the option (or the cash value of the index) at a specified exercise price at any time during the term of the option. The writer of an option on a security has the obligation upon exercise of the option to deliver the underlying security upon payment of the exercise price or to pay the exercise price upon delivery of the underlying security. Upon exercise, the writer of an option on an index is obligated to pay the difference between the cash value of the index and the exercise price multiplied by the specified multiplier for the index option. (An index is designed to reflect features of a particular financial or securities market, a specific group of financial instruments or securities or certain economic indicators.)

The Fund will write call options and put options only if they are “covered.” In the case of a call option on a security, the option is “covered” if the Fund owns the security underlying the call or has an absolute and immediate right to acquire that security without additional cash consideration (or, if additional cash consideration is required, cash or other assets determined to be liquid by the Adviser in accordance with procedures established by the Board of Trustees, in such amount are segregated or “earmarked”) upon conversion or exchange of other securities held by the Fund. For a call option on an index, the option is covered if the Fund maintains with its custodian assets determined to be liquid by the Adviser in accordance with procedures established by the Board of Trustees, in an amount equal to the contract value of the index. A call option is also covered if the Fund holds a call on the same security or index as the call written where the exercise price of the call held is (i) equal to or less than the exercise price of the call written, or (ii) greater than the exercise price of the call written, provided the difference is maintained by the Fund in segregated or “earmarked” assets determined to be liquid by the Adviser in accordance with procedures established by the Board of Trustees. A put option on a security or an index is “covered” if the Fund segregates or “earmarks” assets determined to be liquid by the Adviser in accordance with procedures established by the Board of Trustees equal to the exercise price. A put option is also covered if the Fund holds a put on the same security or index as the put written where the exercise price of the put held is (i) equal to or greater than the exercise price of the put written, or (ii) less than the exercise price of the put written, provided the difference is maintained by the Fund in segregated or “earmarked” assets determined to be liquid by the Adviser in accordance with procedures established by the Board of Trustees.

If an option written by the Fund expires unexercised, the Fund realizes a capital gain equal to the premium received at the time the option was written. If an option purchased by the Fund expires unexercised, that Fund realizes a capital loss equal to the premium paid. Prior to the earlier of exercise or expiration, an exchange traded option may be closed out by an offsetting purchase or sale of an option of the same series (type, exchange, underlying security or index, exercise price and expiration). There can be no assurance, however, that a closing purchase or sale transaction can be effected when the Fund desires.

The Fund may sell put or call options it has previously purchased, which could result in a net gain or loss depending on whether the amount realized on the sale is more or less than the premium and other transaction costs paid on the put or call option which is sold. Prior to exercise or expiration, an option may be closed out by an offsetting purchase or sale of an option of the same series. The Fund will realize a capital gain from a closing purchase transaction if the cost of the closing option is less than the premium received from writing the option, or, if it is more, the Fund will realize a capital loss. If the premium received from a closing sale transaction is more than the premium paid to purchase the option, the Fund will realize a capital gain or, if it is less, the Fund will realize a capital loss. The principal factors affecting the market value of a put or a call option include supply and demand, interest rates, the current market price of the underlying security or index in relation to the exercise price of the option, the volatility of the underlying security or index and the time remaining until the expiration date.

The premium paid for a put or call option purchased by the Fund is an asset of the Fund. The premium received for an option written by the Fund is recorded as a deferred credit. The value of an option purchased or written is marked to market daily and is valued at the closing price on the exchange on which it is traded or, if not traded on an exchange or no closing price is available, at the mean between the last bid and asked prices.

The Fund may write covered straddles consisting of a combination of a call and a put written on the same underlying security. A straddle will be covered when sufficient assets are deposited to meet the Fund's immediate obligations. The Fund may use the same liquid assets to cover both the call and put options where the exercise price of the call and put are the same, or the exercise price of the call is higher than that of the put. In such cases, the Fund will also segregate or " earmark " liquid assets equivalent to the amount, if any, by which the put is " in the money ."

Risks Associated with Options on Securities and Indexes. There are several risks associated with transactions in options on securities and on indexes. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. A decision as to whether, when and how to use options involves the exercise of skill and judgment, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior or unexpected events.

The writer of an option has no control over the time when it may be required to fulfill its obligation as a writer of the option. Once an option writer has received an exercise notice, it cannot effect a closing purchase transaction in order to terminate its obligation under the option and must deliver the underlying security at the exercise price. If a put or call option purchased by the Fund is not sold when it has remaining value, and if the market price of the underlying security remains equal to or greater than the exercise price (in the case of a put), or remains less than or equal to the exercise price (in the case of a call), the Fund will lose its entire investment in the option. Also, where a put or call option on a particular security is purchased to hedge against price movements in a related security, the price of the put or call option may move more or less than the price of the related security.

There can be no assurance that a liquid market will exist when the Fund seeks to close out an option position. If the Fund were unable to close out an option that it had purchased on a security, it would have to exercise the option in order to realize any profit or the option may expire worthless. If the Fund were unable to close out a covered call option that it had written on a security, it would not be able to sell the underlying security unless the option expired without exercise. As the writer of a covered call option, the Fund forgoes, during the option's life, the opportunity to profit from increases in the market value of the security covering the call option above the sum of the premium and the exercise price of the call.

If trading were suspended in an option purchased by the Fund, the Fund would not be able to close out the option. If restrictions on exercise were imposed, the Fund might be unable to exercise an option it has purchased. Except to the extent that a call option on an index written by the Fund is covered by an option on the same index purchased by the Fund, movements in the index may result in a loss to the Fund; however, such losses may be mitigated by changes in the value of the Fund's securities during the period the option was outstanding.

To the extent that the Fund writes a call option on a security it holds in its portfolio and intends to use such security as the sole means of " covering " its obligation under the call option, the Fund has, in return for the premium on the option, given up the opportunity to profit from a price increase in the underlying security above the exercise price during the option period, but, as long as its obligation under such call option continues, has retained the risk of loss should the price of the underlying security decline. If the Fund were unable to close out such a call option, the Fund would not be able to sell the underlying security unless the option expired without exercise.

DOLLAR ROLLS. The Fund may enter into dollar roll agreements, which are similar to reverse repurchase agreements. Dollar rolls are transactions in which securities are sold by the Fund for delivery in the current month and the Fund simultaneously contracts to repurchase substantially similar securities on a specified future date. Any difference between the sale price and the purchase price is netted against the interest income foregone on the securities sold to arrive at an implied borrowing rate. Alternatively, the sale and purchase transactions can be executed at the same price, with the Fund being paid a fee as consideration for entering into the commitment to purchase. Dollar rolls may be renewed prior to cash settlement and initially may involve only a firm commitment agreement by the Fund to buy a security. If the broker-dealer to which the Fund sells the security becomes insolvent, the Fund's right to repurchase the security may be restricted. At the time the Fund enters into a dollar roll, it will place in a segregated custodial account assets such as U.S. Government securities or other liquid, high grade debt securities consistent with the Fund's investment restrictions having a value equal to the repurchase price (including accrued interest) and will subsequently monitor the account to ensure that such equivalent value is maintained.

EVENT-LINKED EXPOSURE. The Fund may obtain event-linked exposure by investing in "event-linked bonds" or "event-linked swaps," or implement "event-linked strategies." Event-linked exposure results in gains that typically are contingent on the non- occurrence of a specific "trigger" event, such as a hurricane, earthquake or other physical or weather-related phenomena. Some event-linked bonds are commonly referred to as "catastrophe bonds." They may be issued by government agencies, insurance companies, reinsurers, special purpose corporations or other on-shore or off-shore entities (such special purpose entities are created to accomplish a narrow and well-defined objective, such as the issuance of a note in connection with a reinsurance transaction). If a trigger event causes losses exceeding a specific amount in the geographic region and time period specified in a bond, the Fund, when investing in the bond may lose a portion or all of its principal invested in the bond. If no trigger event occurs, the Fund will recover its principal plus interest. For some event-linked bonds, the trigger event or losses may be based on company-wide losses, index-portfolio losses, industry indices or readings of scientific instruments rather than specified actual losses. Often the event-linked bonds provide for extensions of maturity that are mandatory, or optional at the discretion of the issuer, in order to process and audit loss claims in those cases where a trigger event has, or possibly has, occurred. An extension of maturity may increase volatility. In addition to the specified trigger events, event-linked bonds may also expose the Fund to certain unanticipated risks including but not limited to issuer risk, credit risk, counterparty risk, adverse regulatory or jurisdictional interpretations and adverse tax consequences.

Event-linked bonds are a relatively new type of financial instrument. As such, there is no significant trading history of these securities, and there can be no assurance that a liquid market in these instruments will develop. See "Illiquid Securities" below. Lack of a liquid market may impose the risk of higher transaction costs and the possibility that the Fund may be forced to liquidate positions when it would not be advantageous to do so. Event-linked bonds are typically rated, and the Fund will only invest in catastrophe bonds that meet the credit quality requirements for the Fund.

FIXED INCOME SECURITIES WITH BUY-BACK FEATURES. Fixed income securities with buy-back features enable the Fund to recover principal upon tendering the securities to the issuer or a third party. Letters of credit issued by domestic or foreign banks often support these buy-back features. In evaluating a foreign bank's credit, the Adviser considers whether adequate public information about the bank is available and whether the bank may be subject to unfavorable political or economic developments, currency controls or other governmental restrictions that could adversely affect the bank's ability to honor its commitment under the letter of credit. Buy-back features include standby commitments, put bonds and demand features.

Standby Commitments. The Fund may acquire standby commitments from broker-dealers, banks or other financial intermediaries to enhance the liquidity of portfolio securities. A standby commitment entitles the Fund to same day settlement at amortized cost plus accrued interest, if any, at the time of exercise. The amount payable by the issuer of the standby commitment during the time that the commitment is exercisable generally approximates the market value of the securities underlying the commitment. Standby commitments are subject to the risk that the issuer of a commitment may not be in a position to pay for the securities at the time that the commitment is exercised.

Ordinarily, the Fund will not transfer a standby commitment to a third party, although the Fund may sell securities subject to a standby commitment at any time. The Fund may purchase standby commitments separate from or in conjunction with the purchase of the securities subject to the commitments. In the latter case, the Fund may pay a higher price for the securities acquired in consideration for the commitment.

Put Bonds. A put bond (also referred to as a tender option or third party bond) is a bond created by coupling an intermediate or long-term fixed rate bond with an agreement giving the holder the option of tendering the bond to receive its par value. As consideration for providing this tender option, the sponsor of the bond (usually a bank, broker-dealer or other financial intermediary) receives periodic fees that equal the difference between the bond's fixed coupon rate and the rate (determined by a remarketing or similar agent) that would cause the bond, coupled with the tender option, to trade at par. By paying the tender offer fees, the Fund in effect holds a demand obligation that bears interest at the prevailing short-term rate. Any investments in tender option bonds by the Fund will be accounted for subject to Financial Accounting Standards Board Statement No. 140 and amendments thereto.

In selecting put bonds for the Fund, the Adviser takes into consideration the creditworthiness of the issuers of the underlying bonds and the creditworthiness of the providers of the tender option features. A sponsor may withdraw the tender option feature if the issuer of the underlying bond defaults on interest or principal payments, the bond's rating is downgraded or, in the case of a municipal bond, the bond loses its tax-exempt status.

Demand Features. Many variable rate securities carry demand features that permit the holder to demand repayment of the principal amount of the underlying securities plus accrued interest, if any, upon a specified number of days' notice to the issuer or its agent. A demand feature may be exercisable at any time or at specified intervals. Variable rate securities with demand features are treated as having a maturity equal to the time remaining before the holder can next demand payment of principal. The issuer of a demand feature instrument may have a corresponding right to prepay the outstanding principal of the instrument plus accrued interest, if any, upon notice comparable to that required for the holder to demand payment.

FOREIGN SECURITIES. The Fund may invest in foreign securities either directly by purchasing foreign securities or indirectly by purchasing depository receipts or depository shares of foreign securities. (See "Depository Receipts" above.) Foreign securities include equity or debt securities issued by issuers outside the United States, and include securities in the form of ADRs and EDRs (see "Depository Receipts"). Direct investments in foreign securities may be made either on foreign securities exchanges or in the over-the-counter markets.

Foreign investments may be affected favorably or unfavorably by changes in currency rates and exchange control regulations. There may be less information available about a foreign company than about a U.S. company, and foreign companies may not be subject to reporting standards and requirements comparable to those applicable to U.S. companies. Foreign securities may not be as liquid as U.S. securities. Securities of foreign companies may involve greater market risk than securities of U.S. companies, Investments in foreign securities may also be subject to local economic or political risks, political instability and possible nationalization of issuers.

Investments in securities of foreign issuers may involve risks that are not associated with domestic investments. Foreign issuers may lack uniform accounting, auditing and financial reporting standards, practices and requirements, and there is generally less publicly available information about foreign issuers than there is about domestic issuers. Securities of some foreign issuers are less liquid and their prices are more volatile than securities of comparable domestic issuers. Income from foreign securities may be reduced by a withholding tax at the source or other foreign taxes. In some countries, there may also be the possibility of nationalization, expropriation or confiscatory taxation (in which case the Fund could lose its entire investment in a certain market), limitations on the removal of monies or other assets of the Fund, higher rates of inflation, political or social instability or revolution, or diplomatic developments that could affect investments in those countries. In addition, it may be difficult to obtain and enforce a judgment in a court outside the United States.

Some of the risks described in the preceding paragraph may be more severe for investments in emerging or developing countries. By comparison with the United States and other developed countries, emerging or developing countries may have relatively unstable governments, economies based on a less diversified industrial base and securities markets that trade a smaller number of securities. Companies in emerging markets may generally be smaller, less experienced and more recently organized than many domestic companies, and prices of those companies' securities tend to be more volatile.

The economies of individual emerging countries may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rates of inflation, currency depreciation, capital reinvestment, resource self-sufficiency and balance of payment position and may be based on a substantially less diversified industrial base. Further, the economies of developing countries generally are heavily dependent upon international trade and, accordingly, have been, and may continue to be, adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been, and may continue to be, adversely affected by economic conditions in the countries with which they trade.

GUARANTEED INVESTMENT CONTRACTS. The Fund may invest in guaranteed investment contracts ("GIC"). A GIC is a general obligation of an insurance company. A GIC is generally structured as a deferred annuity under which the purchaser agrees to pay a given amount of money to an insurer (either in a lump sum or in installments) and the insurer promises to pay interest at a guaranteed rate (either fixed or variable) for the life of the contract. Some GICs provide that the insurer may periodically pay discretionary excess interest over and above the guaranteed rate. At the GIC's maturity, the purchaser generally is given the option of receiving payment or an annuity. Certain GICs may have features that permit redemption by the issuer at a discount from par value.

Generally, GICs are not assignable or transferable without the permission of the issuer. As a result, the acquisition of GICs is subject to the limitations applicable to the Fund's acquisition of illiquid and restricted securities. The holder of a GIC is dependent on the creditworthiness of the issuer as to whether the issuer is able to meet its obligations.

HYBRID INSTRUMENTS. A hybrid instrument is a type of potentially high-risk derivative that combines a traditional stock, bond or commodity with an option or forward contract. Generally, the principal amount, amount payable upon maturity or redemption or interest rate of a hybrid is tied (positively or negatively) to the price of some commodity, currency or securities index or another interest rate or some other economic factor (each a “benchmark”). The interest rate or (unlike most fixed income securities) the principal amount payable at maturity of a hybrid security may be increased or decreased, depending on changes in the value of the benchmark. An example of a hybrid could be a bond issued by an oil company that pays a small base level of interest with additional interest that accrues in correlation to the extent to which oil prices exceed a certain predetermined level. Such a hybrid instrument would be a combination of a bond and a call option on oil.

Hybrids can be used as an efficient means of pursuing a variety of investment goals, including currency hedging duration management and increased total return. Hybrids can be used as an efficient means of pursuing a variety of investment goals, including currency hedging, duration management and increased total return. Hybrids may not bear interest or pay dividends. The value of a hybrid or its interest rate may be a multiple of a benchmark and, as a result, may be leveraged and move (up or down) more steeply and rapidly than the benchmark. These benchmarks may be sensitive to economic and political events, such as commodity shortages and currency devaluations, which cannot be readily foreseen by the purchaser of a hybrid. Under certain conditions, the redemption value of a hybrid could be zero. Thus, an investment in a hybrid may entail significant market risks that are not associated with a similar investment in a traditional, U.S. dollar-denominated bond that has a fixed principal amount and pays a fixed rate or floating rate of interest. The purchase of hybrids also exposes the Fund to the credit risk of the issuer of the hybrids. These risks may cause significant fluctuations in the NAV of the Fund.

Certain hybrid instruments may provide exposure to the commodities markets. These are derivative securities with one or more commodity-linked components that have payment features similar to commodity futures contracts, commodity options or similar instruments. Commodity-linked hybrid instruments may be either equity or debt securities, leveraged or unleveraged, and are considered hybrid instruments because they have both security and commodity-like characteristics. A portion of the value of these instruments may be derived from the value of a commodity, futures contract, index or other economic variable. The Fund will only invest in commodity-linked hybrid instruments that qualify under applicable rules of the CFTC for an exemption from the provisions of the CEA.

Certain issuers of structured products such as hybrid instruments may be deemed to be investment companies as defined in the 1940 Act. As a result, the Fund’s investments in these products may be subject to limits applicable to investments in investment companies and may be subject to restrictions contained in the 1940 Act.

ILLIQUID SECURITIES AND LIQUIDITY RISK MANAGEMENT PLAN. The Fund may not knowingly invest more than 15% of its net assets in illiquid securities. Illiquid securities are securities that cannot be disposed of within seven days at approximately the value at which they are being carried on the Fund’s books. The Board of Trustees has the ultimate responsibility for determining whether specific securities are liquid or illiquid. The Board of Trustees has delegated the function of making day to day determinations of liquidity to the Adviser, pursuant to guidelines approved by the Board of Trustees. The Adviser will monitor the liquidity of securities held by the Fund and report periodically on such decisions to the Board of Trustees. If the limitations on illiquid securities are exceeded, other than by a change in market values, the condition will be reported by the Adviser to the Board of Trustees. Illiquid securities would generally include repurchase agreements with notice/termination dates in excess of seven days and certain securities which are subject to trading restrictions because they are not registered under the Securities Act of 1933, as amended (the “1933 Act”). External market conditions may impact the liquidity of portfolio securities and may cause the Fund to sell or divest certain illiquid securities in order to comply with its limitation on holding illiquid securities, which may result in realized losses to the Fund.

Rule 22e-4 under the 1940 Act requires, among other things, that the Fund establish a liquidity risk management program (“LRMP”) that is reasonably designed to assess and manage liquidity risk. Rule 22e-4 defines “liquidity risk” as the risk that a fund could not meet requests to redeem shares issued by the fund without significant dilution of the remaining investors’ interests in the fund. The Fund has implemented a LRMP to meet the relevant requirements. Additionally, the Board, including a majority of the Independent Trustees, approved the designation of a committee of individuals comprised of the Fund’s President, Treasurer, and Chief Compliance Officer (the “LRMP Administrator”) to administer the LRMP. The Board will review no less frequently than annually a written report prepared by the LRMP Administrator that addresses the operation of the LRMP and assesses its adequacy and effectiveness of implementation. Among other things, the LRMP provides for the classification of each Fund investment as a “highly liquid investment,” “moderately liquid investment,” “less liquid investment” or “illiquid investment.” The liquidity risk classifications of the Fund’s investments are determined after reasonable inquiry and taking into account relevant market, trading and investment-specific considerations. To the extent that a Fund investment is deemed to be an “illiquid investment” or a “less liquid investment,” the Fund can expect to be exposed to greater liquidity risk. There is no guarantee the LRMP will be effective in its operations, and complying with Rule 22e-4, including bearing related costs, could impact the Fund’s performance and its ability to achieve its investment objective.

INFLATION-PROTECTED DEBT SECURITIES. The Fund may invest in inflation-protected debt securities or inflation-indexed bonds, which are fixed income securities whose value is periodically adjusted according to the rate of inflation. Two structures are common. The U.S. Treasury and some other issuers utilize a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the Consumer Price Index (“CPI”) accruals as part of a semi-annual coupon.

Treasury Inflation Protected Securities (“TIPS”) have maturities of approximately five, ten or thirty years, although it is possible that securities with other maturities will be issued in the future. The U.S. Treasury securities pay interest on a semi-annual basis equal to a fixed percentage of the inflation-adjusted principal amount. For example, if the Fund purchased TIPS with a par value of \$1,000 and a 3% real rate of return coupon (payable 1.5% semi-annually), and the rate of inflation over the first six months was 1%, the mid-year par value of the bond would be \$1,010 and the first semi-annual interest payment would be \$15.15 (\$1,010 times 1.5%). If inflation during the second half of the year resulted in the whole year’s inflation equaling 3%, the end-of-year par value of the bond would be \$1,030 and the second semi-annual interest payment would be \$15.45 (\$1,030 times 1.5%).

If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of TIPS, even during a period of deflation. However, the current market value of the bonds is not guaranteed and will fluctuate. The Fund may also invest in other inflation-related bonds which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal amount.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if the rate of inflation rises at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increase at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds.

While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond’s inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the Consumer Price Index for Urban Consumers (“CPI-U”), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

INVESTMENT COMPANY SECURITIES AND EXCHANGE-TRADED FUNDS. The Fund may invest in investment company securities issued by open-end and closed-end investment companies, including exchange traded funds (“ETFs”). Such investments are subject to limitations prescribed by the 1940 Act unless an SEC exemption is applicable, or as may be permitted by rules under the 1940 Act or SEC staff interpretations thereof. The 1940 Act limitations currently provide, in part, that the Fund may not purchase shares of an investment company if: (a) such a purchase would cause the Fund to own in the aggregate more than 3% of the total outstanding voting stock of the investment company; (b) such a purchase would cause the Fund to have more than 5% of its total assets invested in the investment company; or (c) more than 10% of the Fund’s total assets would be invested in the aggregate in all investment companies. As a shareholder in an investment company, the Fund would bear its pro-rata portion of the investment company’s expenses, including advisory fees, in addition to its own expenses. Although the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, registered investment companies are permitted to invest in certain ETFs beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions set forth in an SEC exemptive order issued to such ETFs, including that such investment companies enter into an agreement with such ETF. Set forth below is additional information about the manner in which ETFs generally operate and the risks associated with an investment in ETFs.

In the event that the Fund purchases shares of ETFs, such purchase is expected to be made through a broker-dealer in transaction on a securities exchange, and in such a case the Fund will pay customary brokerage commissions for each purchase and sale. Shares of an ETF may also be acquired by depositing a specified portfolio of the ETF’s underlying securities, as well as a cash payment generally equal to accumulated dividends of the securities (net of expenses) up to the time of deposit, with the ETF’s custodian, in exchange for which the ETF will issue a quantity of new shares sometimes referred to as a “creation unit.” Similarly, shares of an ETF purchased on an exchange may be accumulated until they represent a creation unit, and the creation unit may be redeemed in kind for a portfolio of the underlying securities (based on the ETF’s NAV) together with a cash payment generally equal to accumulated dividends as of the date of redemption. The Fund may redeem creation units for the underlying securities (and any applicable cash), and may assemble a portfolio of the underlying securities (and any required cash) to purchase creation units, if the Adviser believes it is in the Fund’s interest to do so. The Fund’s ability to redeem creation units may be limited by the 1940 Act, which provides that an ETF will not be obligated to redeem shares held by the Fund in an amount exceeding one percent of such ETF’s total outstanding securities during any period of less than 30 days.

Termination Risk. There is a risk that ETFs in which the Fund invests may terminate due to extraordinary events. For example, any of the service providers to ETFs, such as the trustee or sponsor, may close or otherwise fail to perform their obligations to the ETF, and the ETF may not be able to find a substitute service provider. Also, the ETFs may be dependent upon licenses to use the various indices as a basis for determining their compositions and/or otherwise to use certain trade names. If these licenses are terminated, ETFs may also terminate or experience a disruption in its activities. In addition, an ETF may terminate if its net assets fall below a certain amount.

Although the Adviser believes that, in the event of the termination of an ETF, the Fund will be able to invest instead in shares of an alternate ETF tracking the same market index or another index covering the same general market, there can be no assurance that shares of an alternate ETF would be available for investment at that time.

INVESTMENTS IN COMMODITY/NATURAL RESOURCE-RELATED SECURITIES. As discussed under “Investment Limitations” below, the Fund does not invest directly in commodities. However, the Fund may from time to time invest in securities of companies whose business is related to commodities and natural resources or in registered investment companies or other companies that invest directly or indirectly in commodities and natural resources. For example, the Fund may invest in companies whose business is related to mining of precious or other metals (e.g., gold, silver, etc.) or registered investment companies that invest in securities of mining companies and related instruments (including, without limitation, the underlying commodities). Investments in equity securities of companies involved in mining or related precious metals industries, and the value of the investment companies and other companies that invest in precious metals and other commodities are subject to a number of risks. For example, the prices of precious metals or other commodities can move sharply, up or down, in response to cyclical economic conditions, political events or the monetary policies of various countries, any of which may adversely affect the value of companies whose business is related to such commodities or the value of investment companies and other companies investing in such business or commodities. Furthermore, such companies are subject to risks related to fluctuations of prices and perceptions of value in the commodity markets generally.

MONEY MARKET FUNDS. The Fund may invest in the securities of money market mutual funds. Such investments are subject to limitations prescribed by the 1940 Act, the rules thereunder and applicable SEC staff interpretations thereof, or applicable exemptive relief granted by the SEC. (See “Investment Company Securities and Exchange-Traded Funds” above.)

BELOW-INVESTMENT GRADE SECURITIES. Subject to the limitations set forth in the Prospectus, the Fund may invest in “below-investment grade” or “high yield” fixed income securities commonly known to investors as “high yield bonds” or “junk bonds.” High yield bonds are issued by a company whose credit rating (based on an NRSRO) evaluation of the likelihood of repayment) necessitates offering a higher coupon and yield on its issues when selling them to investors who may otherwise be hesitant in purchasing the debt of such a company. While generally providing greater income and opportunity for gain, below-investment grade debt securities are generally subject to greater risks than fixed income securities which have higher credit ratings, including a higher risk of default, and their yields will fluctuate over time. High yield bonds generally will be in the lower rating categories of NRSROs (rated “Ba” or lower by Moody’s or “BB” or lower by S&P and Fitch or will be unrated). The credit rating of a high yield bond does not necessarily address its market value risk, and ratings may from time to time change, positively or negatively, to reflect developments regarding the issuer’s financial condition. High yield bonds are considered to be speculative with respect to the capacity of the issuer to timely repay principal and pay interest or dividends in accordance with the terms of the obligation and may have more credit risk than higher rated securities.

While the market values of high yield bonds tend to react less to fluctuations in interest rates than do those of higher rated securities, the values of high yield bonds often reflect individual corporate developments and have a high sensitivity to economic changes to a greater extent than do higher rated securities. Issuers of high yield bonds are often in the growth stage of their development and/or involved in a reorganization or takeover. The companies are often highly leveraged (have a significant amount of debt relative to shareholders’ equity) and may not have available to them more traditional financing methods, thereby increasing the risk associated with acquiring these types of securities. In some cases, obligations with respect to high yield bonds are subordinated to the prior repayment of senior indebtedness, which will potentially limit the Fund’s ability to fully recover principal or to receive interest payments when senior securities are in default. Thus, investors in high yield bonds have a lower degree of protection with respect to principal and interest payments than do investors in higher rated securities.

During an economic downturn, a substantial period of rising interest rates or a recession, highly leveraged issuers of high yield bonds may experience financial distress possibly resulting in insufficient revenues to meet their principal and interest payment obligations, to meet projected business goals and to obtain additional financing. An economic downturn could also disrupt the market for lower-rated securities and adversely affect the value of outstanding securities, the Fund’s NAV and the ability of the issuers to repay principal and interest. If the issuer of a security held by the Fund has defaulted, the Fund may not receive full interest and principal payments due to it and could incur additional expenses if it chose to seek recovery of its investment.

The secondary markets for high yield bonds are not as liquid as the secondary markets for higher rated securities. The secondary markets for high yield bonds are concentrated in relatively few market makers and participants in the markets are mostly institutional investors, including insurance companies, banks, other financial institutions and mutual funds. In addition, the trading volume for high yield bonds is generally lower than that for higher rated securities and the secondary markets could contract under adverse market or economic conditions independent of any specific adverse changes in the condition of a particular issuer. Under certain economic and/or market conditions, the Fund may have difficulty disposing of certain high yield bonds due to the limited number of investors in that sector of the market. An illiquid secondary market may adversely affect the market price of the high yield security, which may result in increased difficulty selling the particular issue and obtaining accurate market quotations on the issue when valuing the Fund's assets. Market quotations on high yield bonds are available only from a limited number of dealers, and such quotations may not be the actual prices available for a purchase or sale.

The high yield markets may react strongly to adverse news about an issuer or the economy, or to the perception or expectation of adverse news, whether or not it is based on fundamental analysis. Additionally, prices for high yield bonds may be affected by legislative and regulatory developments. These developments could adversely affect the Fund's NAV and investment practices, the secondary market for high yield bonds, the financial condition of issuers of these securities and the value and liquidity of outstanding high yield bonds, especially in a thinly traded market. For example, Federal legislation requiring the divestiture by federally insured savings and loan associations of their investments in high yield bonds and limiting the deductibility of interest by certain corporate issuers of high yield bonds adversely affected the market in the past.

When the secondary market for high yield bonds becomes more illiquid, or in the absence of readily available market quotations for such securities, the relative lack of reliable objective data makes it more difficult to value the Fund's securities and judgment plays a more important role in determining such valuations. Increased illiquidity in the junk bond market, in combination with the relative youth and growth of the market for such securities, also may affect the ability of the Fund to dispose of such securities at a desirable price. Additionally, if the secondary markets for high yield bonds contract due to adverse economic conditions or for other reasons, some of the Fund's liquid securities may become illiquid and the proportion of the Fund's assets invested in illiquid securities may significantly increase.

The rating assigned by a rating agency evaluates the safety of a below-investment grade security's principal and interest payments but does not address market value risk. Because such ratings of NRSROs may not always reflect current conditions and events, in addition to using NRSROs and other sources, the Adviser performs its own analysis of the issuers whose below-investment grade securities are held by the Fund. Because of this, the Fund's performance may depend more on the Adviser's own credit analysis than in the case of mutual funds investing in higher-rated securities. For a description of these ratings, see "Appendix A - Description of Securities Ratings."

In selecting below-investment grade securities, the Adviser considers factors such as those relating to the creditworthiness of issuers, the ratings and performance of the securities, the protections afforded the securities and the diversity of the Fund. The Adviser continuously monitors the issuers of below-investment grade securities held by the Fund for their ability to make required principal and interest payments, as well as in an effort to control the liquidity of the Fund so that it can meet redemption requests. If a security's rating is reduced below the minimum credit rating that is permitted for the Fund, the Adviser will consider whether the Fund should continue to hold the security.

In the event that the Fund investing in high yield bonds experiences an unexpected level of net redemptions, the Fund could be forced to sell its holdings without regard to the investment merits, thereby decreasing the assets upon which the Fund's rate of return is based. The costs attributable to investing in the high yield markets are usually higher for several reasons, such as higher investment research costs and higher commission costs.

PARTICIPATION INTERESTS. The Fund may invest in participation interests in fixed income securities. A participation interest provides the certificate holder with a specified interest in an issue of fixed income securities.

Some participation interests give the holders differing interests in the underlying securities, depending upon the type or class of certificate purchased. For example, coupon strip certificates give the holder the right to receive a specific portion of interest payments on the underlying securities; principal strip certificates give the holder the right to receive principal payments and the portion of interest not payable to coupon strip certificate holders. Holders of certificates of participation in interest payments may be entitled to receive a fixed rate of interest, a variable rate that is periodically reset to reflect the current market rate or an auction rate that is periodically reset at auction. Asset-backed residuals represent interests in any excess cash flow remaining after required payments of principal and interest have been made.

More complex participation interests involve special risk considerations. Since these instruments have only recently been developed, there can be no assurance that any market will develop or be maintained for the instruments. Generally, the fixed income securities that are deposited in trust for the holders of these interests are the sole source of payments on the interests; holders cannot look to the sponsor or trustee of the trust or to the issuers of the securities held in trust or to any of their affiliates for payment.

Participation interests purchased at a discount may experience price volatility. Certain types of interests are sensitive to fluctuations in market interest rates and to prepayments on the underlying securities. A rapid rate of prepayment can result in the failure to recover the holder's initial investment.

The extent to which the yield to maturity of a participation interest is sensitive to prepayments depends, in part, upon whether the interest was purchased at a discount or premium, and if so, the size of that discount or premium. Generally, if a participation interest is purchased at a premium and principal distributions occur at a rate faster than that anticipated at the time of purchase, the holder's actual yield to maturity will be lower than that assumed at the time of purchase. Conversely, if a participation interest is purchased at a discount and principal distributions occur at a rate faster than that assumed at the time of purchase, the investor's actual yield to maturity will be higher than that assumed at the time of purchase.

Participation interests in pools of fixed income securities backed by certain types of debt obligations involve special risk considerations. The issuers of securities backed by automobile and truck receivables typically file financing statements evidencing security interests in the receivables, and the servicers of those obligations take and retain custody of the obligations. If the servicers, in contravention of their duty to the holders of the securities backed by the receivables, were to sell the obligations, the third party purchasers could acquire an interest superior to the interest of the security holders. Also, most states require that a security interest in a vehicle must be noted on the certificate of title and the certificate of title may not be amended to reflect the assignment of the lender's security interest. Therefore, the recovery of the collateral in some cases may not be available to support payments on the securities. Securities backed by credit card receivables are generally unsecured, and both Federal and state consumer protection laws may allow set-offs against certain amounts owed.

PREFERRED STOCK. The Fund may invest in preferred stocks. Preferred stock has a preference over common stock in liquidation (and generally dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

REAL ESTATE SECURITIES AND RELATED DERIVATIVES. The Fund may gain exposure to the real estate sector by investing in real estate-linked derivatives, real estate investment trusts ("REITs") and common, preferred and convertible securities of issuers in real estate-related industries. Each of these types of investments are subject to risks similar to those associated with direct ownership of real estate, including loss to casualty or condemnation, increases in property taxes and operating expenses, zoning law amendments, changes in interest rates, overbuilding and increased competition, variations in market value and possible environmental liabilities. The Fund may also invest in rights or warrants to purchase income-producing common and preferred shares of issuers in real estate-related industries. It is anticipated that substantially all of the equity securities of issuers in real estate-related industries in which the Fund intends to invest will be traded on a national securities exchange or in the over-the-counter market.

REITs are pooled investment vehicles that own and typically operate income-producing real estate. If a REIT meets certain requirements, including distributing to shareholders substantially all of its taxable income (other than net capital gains), then it is not taxed on the income distributed to shareholders. REITs are subject to management fees and other expenses, and so the Fund, when investing in REITs, will bear its proportionate share of the costs of the REITs' operations.

There are three general categories of REITs: Equity REITs, Mortgage REITs and Hybrid REITs. Equity REITs invest primarily in direct fee ownership or leasehold ownership of real property; they derive most of their income from rents. Mortgage REITs invest mostly in mortgages on real estate, which may secure construction, development or long-term loans, and the main source of their income is mortgage interest payments. Hybrid REITs hold both ownership and mortgage interests in real estate.

Along with the risks common to different types of real estate-related securities, REITs, no matter the type, involve additional risk factors. These include poor performance by the REIT's manager, changes to the tax laws, and failure by the REIT to qualify for tax-free distribution of income or exemption under the 1940 Act. Furthermore, REITs are not diversified and are heavily dependent on cash flow. REITs can be listed and traded on national securities exchanges or can be traded privately between individual owners.

RESTRICTED SECURITIES. Restricted securities are securities that may not be sold to the public without registration under the 1933 Act or an exemption from registration. The Fund is subject to an investment limitation on the purchase of illiquid securities. Restricted securities, including securities eligible for re-sale pursuant to Rule 144A under the 1933 Act, that are determined to be liquid are not subject to this limitation. This determination is to be made by the Adviser pursuant to guidelines adopted by the Board of Trustees. Under these guidelines, the Adviser will consider the frequency of trades and quotes for the security, the number of dealers in, and potential purchasers for, the securities, dealer undertakings to make a market in the security and the nature of the security and of the marketplace trades. In purchasing such restricted securities, the Adviser intends to purchase securities that are exempt from registration under Rule 144A.

SECURITIES LENDING. For the purpose of achieving income, the Fund may lend its portfolio securities to brokers, dealers and other financial institutions, provided: (i) the loan is secured continuously by collateral consisting of U.S. Government securities, cash or cash equivalents (negotiable certificates of deposits, bankers' acceptances or letters of credit) maintained on a daily mark-to-market basis in an amount at least equal to the current market value of the securities loaned; (ii) the Fund may at any time call the loan and obtain the return of the securities loaned; (iii) the Fund will receive any interest or dividends paid on the loaned securities; and (iv) the aggregate market value of securities loaned will not at any time exceed 33-1/3% of the total assets of the Fund. The Fund's performance will continue to reflect the receipt of either interest through investment of cash collateral by the Fund in permissible investments, or a fee, if the collateral is U.S. Government securities. Securities lending involves the risk of loss of rights in the collateral or delay in recovery of the collateral should the borrower fail to return the securities loaned or become insolvent. The Fund may pay lending fees to the party arranging the loan.

SHORT SALES. The Fund may make short sales of securities as part of its overall portfolio management strategy involving the use of derivative instruments to gain exposure to or adjust exposure to various market sectors, and to offset potential declines in long positions in similar securities or otherwise take advantage of market conditions. A short sale is a transaction in which the Fund sells a security it does not own in anticipation that the market price of that security will decline.

When the Fund makes a short sale, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale as collateral for its obligation to deliver the security upon conclusion of the sale. The Fund may have to pay a fee to borrow particular securities and is often obligated to pay over any accrued interest and dividends on such borrowed securities.

If the price of the security sold short increases between the time of the short sale and the time that the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss increased, by the transaction costs described above. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged.

To the extent that the Fund engages in short sales, it will provide collateral to the broker-dealer and (except in the case of short sales "against the box") will maintain additional asset coverage in the form of segregated or "earmarked" assets determined to be liquid by the Adviser in accordance with procedures established by the Board of Trustees. The Fund does not intend to enter into short sales (other than those "against the box") if immediately after such sale the aggregate of the value of all collateral plus the amount of the segregated or "earmarked" assets exceeds one-third of the value of the Fund's assets. This percentage may be varied by action of the Trustees. A short sale is "against the box" to the extent that the Fund contemporaneously owns, or has the right to obtain at no added cost, securities identical to those sold short. The Fund will engage in short selling to the extent permitted by the 1940 Act and rules and interpretations thereunder.

U.S. GOVERNMENT OBLIGATIONS. The Fund may invest in debt securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities. Although all obligations of such agencies and instrumentalities are not direct obligations of the U.S. Treasury, the U.S. Government generally directly or indirectly backs payment of the interest and principal on these obligations. This support can range from securities supported by the full faith and credit of the United States (for example, GNMA securities) to securities that are supported solely or primarily by the creditworthiness of the issuer, such as securities of FNMA, FHLMC, the Tennessee Valley Authority, Federal Farm Credit Banks and Federal Home Loan Banks. In the case of obligations not backed by the full faith and credit of the United States, the Fund must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment and may not be able to assert a claim against the United States itself in the event the agency or instrumentality does not meet its commitments. Whether backed by full faith and credit of the U.S. Treasury or not, U.S. Government obligations are not guaranteed against price movements due to fluctuating interest rates.

VARIABLE AND FLOATING RATE SECURITIES. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular and range from daily up to annually, or may be event based, such as based on a change in the prime rate.

The Fund may invest in floating rate debt instruments ("floaters") and engage in credit spread trades. The interest rate on a floater is a variable rate which is tied to another interest rate, such as a money-market index or Treasury bill rate. The interest rate on a floater resets periodically, typically every six months. While, because of the interest rate reset feature, floaters provide the Fund with a certain degree of protection against rises in interest rates, the Fund will participate in any declines in interest rates as well. A credit spread trade is an investment position relating to a difference in the prices or interest rates of two securities or currencies, where the value of the investment position is determined by movements in the difference between the prices or interest rates, as the case may be, of the respective securities or currencies.

The Fund may also invest in inverse floating rate debt instruments (“inverse floaters”). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed. An inverse floating rate security may exhibit greater price volatility than a fixed rate obligation of similar credit quality. See “Mortgage-Related and Other Asset-Backed Securities” for a discussion of IOs and POs.

WARRANTS TO PURCHASE SECURITIES. The Fund may invest in or acquire warrants to purchase equity or fixed income securities. Warrants are instruments that give the holder the right, but not the obligation, to buy a security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments. Bonds with warrants attached to purchase equity securities have many characteristics of convertible bonds and their prices may, to some degree, reflect the performance of the underlying stock. Bonds also may be issued with warrants attached to purchase additional fixed income securities at the same coupon rate. A decline in interest rates would permit the Fund to buy additional bonds at the favorable rate or to sell the warrants at a profit. If interest rates rise, the warrants would generally expire with no value.

WHEN-ISSUED, DELAYED DELIVERY AND FORWARD COMMITMENT TRANSACTIONS. The Fund may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis. When such purchases are outstanding, the Fund will segregate or “ earmark ” until the settlement date assets determined to be liquid by the Adviser in accordance with procedures established by the Board of Trustees, in an amount sufficient to meet the purchase price. Typically, no income accrues on securities the Fund has committed to purchase prior to the time delivery of the securities is made, although the Fund may earn income on securities it has segregated or “ earmarked .”

When purchasing a security on a when-issued, delayed delivery or forward commitment basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its NAV. Because the Fund is not required to pay for the security until the delivery date, these risks are in addition to the risks associated with the Fund’s other investments. If the Fund remains substantially fully invested at a time when when-issued, delayed delivery or forward commitment purchases are outstanding, the purchases may result in a form of leverage.

When the Fund sells a security on a when-issued, delayed delivery or forward commitment basis, the Fund does not participate in future gains or losses with respect to the security. If the other party to a transaction fails to deliver or pay for the securities, the Fund could miss a favorable price or yield opportunity or could suffer a loss. The Fund may dispose of or renegotiate a transaction after it is entered into, and may sell when-issued, delayed delivery or forward commitment securities before they are delivered, which may result in a capital gain or loss. There is no percentage limitation on the extent to which the Fund may purchase or sell securities on a when-issued, delayed delivery or forward commitment basis.

TEMPORARY DEFENSIVE POSITIONS. The Fund may, without limit, invest in U.S. Government securities, commercial paper and other money market instruments, money market funds, cash or cash equivalents in response to adverse market conditions, as a temporary defensive position. The result of this action may be that the Fund will be unable to achieve its investment objective.

PORTFOLIO TURNOVER. The Adviser does not anticipate significant variation in the portfolio turnover rate from that reported in the Fund’s Prospectus for the last fiscal year. There has not been any significant variation in the Fund’s portfolio turnover rates over the most recently completed fiscal year.

DISCLOSURE OF PORTFOLIO HOLDINGS

As required by the federal or state securities laws, including the 1940 Act, the Fund discloses portfolio holdings in applicable regulatory filings, including shareholder reports, reports on Form N-CSR, Form N-Q and Form N-PORT, or such other filings, reports or disclosure documents as the applicable regulatory authorities may require. The Fund’s complete list of portfolio holdings are available sixty days after each fiscal quarter end in the Form N-CSR (semiannually), Form N-PORT (quarterly) and Form N-Q (1st and 3rd fiscal quarters).

The Board of Trustees has adopted policies and procedures regarding the selective disclosure of portfolio securities holdings. The policies and procedures are designed to allow disclosure of the Fund’s holdings information where it is deemed appropriate for the Fund’s operations or it is determined to be useful to the Fund’s shareholders without compromising the integrity or performance of the Fund. Except when there are legitimate business purposes for selective disclosure of the Fund’s holdings, the Fund will not provide or permit others to provide information about the Fund’s holdings on a selective basis. The Board of Trustees provides ongoing oversight of the Trust’s policies and procedures and compliance with such policies and procedures. As part of this oversight function, the Trustees receive from the Trust’s Chief Compliance Officer (“CCO”) as necessary, reports on compliance with these policies and procedures.

In addition, the Trustees receive an annual assessment of the adequacy and effect of the policies and procedures with respect to the Fund, and any changes thereto, and an annual review of the operation of the policies and procedures. Any deviation to this policy as well as any corrective action undertaken to address such deviations must be reported to the Trust's Board of Trustees (the "Board") at its next quarterly Board meeting or sooner, as determined by the CCO.

The Fund may, but is not required to, post its schedule of investments on its website at regular intervals or from time to time at the discretion of the Adviser. This information may be as of the most practicable date available and need not be subject to a lag period prior to posting on the website. In addition to its schedule of investments, the Fund may post portfolio holdings information and other information on a website including, but not limited to, information about the number of securities the Fund holds, a summary schedule of investments, the Fund's top holdings, and a percentage breakdown of the Fund's investments by geographic region, sector, industry and market capitalization. After any portfolio holdings information becomes publicly available (by posting on the website or otherwise); it may be mailed, e-mailed or otherwise transmitted to any person.

The following disclosures of aggregate, composite or descriptive information about the Fund or its portfolio holdings are not subject to the Trust's policy on selective disclosure of portfolio information: (i) descriptions of allocations among classes, geographic regions, countries, industries or sectors; (ii) aggregated data such as average or median ratios or market capitalization; (iii) performance attribution by class, geographic region, country, industry or sector; (iv) aggregated risk statistics; (v) listing of top holdings without any reference to the amount of the Fund's holdings; and (vi) such other information that, in the opinion of the CCO or designee, does not present material risks of dilution, arbitrage, market timing, insider trading or other inappropriate trading of the Fund. The Fund's portfolio holdings may also be disclosed, upon authorization by a designated officer of the Adviser, to financial consultants to assist them in determining the suitability of the Fund as an investment for their clients, in each case in accordance with the anti-fraud provisions of the federal securities laws and the Adviser's fiduciary duties to Fund shareholders.

Disclosures to financial consultants are also subject to a confidentiality agreement and/or trading restrictions.

The Board of Trustees of the Trust, a committee thereof, or an officer designated by the Board, may, in limited circumstances, permit other selective disclosure of portfolio holdings subject to a confidentiality agreement and/or trading restrictions.

The Fund may distribute or authorize the distribution of information about its holdings that is not publicly available (on a website or otherwise) to the Fund's or the Adviser's employees and affiliates that provide services to the Fund. The Fund may also distribute or authorize the distribution of information about the Fund's holdings that is not publicly available (on a website or otherwise) to the Fund's service providers who require access to the information (i) in order to fulfill their contractual duties relating to the Fund; (ii) to facilitate the transition of a newly hired investment adviser prior to the commencement of its duties; (iii) to facilitate the review of the Fund by a ranking or ratings agency; (iv) for the purpose of due diligence regarding a merger or acquisition; or (v) for the purpose of effecting in-kind redemption of securities to facilitate orderly redemption of the Fund's assets and minimize impact on remaining shareholders of the Fund.

Each of the following third parties has been approved to receive portfolio holdings information: (i) the Fund's administrator and accounting agent; (ii) the Fund's independent registered public accounting firm, for use in providing audit opinions; (iii) financial printers, solely for the purpose of preparing the Fund's reports or regulatory filings; (iv) the Fund's custodian in connection with its custody of the Fund's assets; (v) if applicable, a proxy voting service; or (vi) disclosure to a ranking or rating agency, such as Lipper, Inc., Morningstar, Inc., Moody's, S&P and Fitch. Information may be provided to these parties at any time so long as each of these parties is contractually and ethically prohibited from sharing the Fund's portfolio holding information without specific authorization. The Adviser and service providers have also established procedures to ensure that the Fund's portfolio holdings information is only disclosed in accordance with these policies.

Under no circumstances may the Fund, the Adviser or their affiliates receive any consideration or compensation for disclosing portfolio holdings information.

INVESTMENT LIMITATIONS

The Fund has adopted the investment limitations set forth below. Except with respect to the asset coverage requirement under Section 18(f)(1) of the 1940 Act with respect to borrowing, if any percentage restriction on investment or utilization of assets is adhered to at the time an investment is made, a later change in percentage resulting from a change in the market values of the Fund or the Fund's assets or redemptions of shares will not be considered a violation of the limitation. The asset coverage requirement under Section 18(f)(1) of the 1940 Act with respect to borrowings is an ongoing requirement. The following non-fundamental policies apply to the Fund and the Board of Trustees may change them without shareholder approval unless shareholder approval is required by the 1940 Act or the rules and regulations thereunder. The Fund will not:

1. Issue senior securities or borrow money, except as permitted under the 1940 Act and the rules and regulations thereunder, and then not in excess of 33-1/3% of the Fund's total assets (including the amount of the senior securities issued but reduced by any liabilities not constituting senior securities) at the time of the issuance or borrowing, except that the Fund may borrow up to an additional 5% of its total assets (not including the amount borrowed) for temporary purposes such as clearance of portfolio transactions and share redemptions. For purposes of these restrictions, the purchase or sale of securities on a when-issued, delayed delivery or forward commitment basis, the purchase and sale of options and futures contracts and collateral arrangements with respect thereto are not deemed to be the issuance of a senior security, a borrowing or a pledge of assets;

2. Underwrite any issue of securities, except to the extent that the Fund may be considered to be acting as underwriter in connection with the disposition of any portfolio security;
3. Invest 25% or more of the value of the Fund's assets in securities of issuers in any one industry. This restriction does not apply to obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities or to securities issued by other investment companies. For purposes of this limitation states, municipalities and their political subdivisions are not considered to be part of any industry;
4. Purchase securities of any one issuer if, as a result, more than 5% of the Fund's total assets would be invested in securities of that issuer or the Fund would own more than 10% of the outstanding voting securities of that issuer, except that (a) up to 25% of the Fund's total assets may be invested without regard to this limitation; and (b) this limitation does not apply to securities issued or guaranteed by the U.S. Government, its agencies and instrumentalities ("U.S. Government obligations") or to securities issued by other investment companies. Repurchase agreements fully collateralized by U.S. Government obligations are treated as U.S. Government obligations. For the purpose of this limitation each state and each separate political subdivision, agency, authority or instrumentality of such state, each multi-state agency or authority and each obligor, if any, is treated as a separate issuer of municipal securities;
5. Purchase or sell real estate or interests therein, although the Fund may purchase securities of issuers which engage in real estate operations and securities secured by real estate or interests therein, including real estate investment trusts;
6. Purchase or sell physical commodities, unless acquired as a result of owning securities or other instruments, but the Fund may purchase, sell or enter into financial options and futures, forward contracts and swap transactions and other financial contracts or derivative instruments;
7. Make loans, except loans of portfolio securities or through repurchase agreements, provided that for purposes of this restriction, the acquisition of bonds, debentures, other debt securities or instruments, or participations or other interests therein and investments in government obligations, commercial paper, certificates of deposit, bankers' acceptances or similar instruments will not be considered the making of a loan;
8. Engage in short sales of securities or maintain a short position, except that the Fund may (a) sell short "against the box" and (b) maintain short positions in connection with its use of financial options and futures, forward contracts, swap transactions and other financial contracts or derivative instruments; or
9. Purchase securities on margin except for the use of short-term credit necessary for the clearance of purchases and sales of portfolio securities, provided that the Fund may make initial and variation margin deposits in connection with permitted transactions in options and futures, forward contracts, swap transactions and other financial contracts or derivative instruments.

When engaging in options and futures contract strategies, the Fund will either: (1) earmark or set aside cash or liquid securities in a segregated account with the custodian in the prescribed amount; or (2) hold securities or other options or futures contracts whose values are expected to offset ("cover") its obligations thereunder. Securities, currencies or other options or futures contracts used for cover cannot be sold or closed out while the strategy is outstanding, unless they are replaced with similar assets.

For the purpose of applying the limitations set forth in (4) and (5) above, an issuer shall be deemed the sole issuer of a security when its assets and revenues are separate from other governmental entities and its securities are backed only by its assets and revenues. Similarly, in the case of a non-governmental user, such as an industrial corporation or a privately owned or operated hospital, if the security is backed only by the assets and revenues of the non-governmental user, then such non-governmental user would be deemed to be the sole issuer. Where a security is also backed by the enforceable obligation of a superior or unrelated governmental entity or other entity (other than a bond insurer), it shall also be included in the computation of securities owned that are issued by such governmental or other entity. Where a security is guaranteed by a governmental entity or some other facility, such as a bank guarantee or letter of credit, such a guarantee or letter of credit would be considered a separate security and would be treated as an issue of such government, other entity or bank. Where a security is insured by bond insurance, it shall not be considered a security issued or guaranteed by the insurer; instead the issuer of such security will be determined in accordance with the principles set forth above. The foregoing restrictions do not limit the percentage of the Fund's assets that may be invested in securities insured by any single insurer.

TRUSTEES AND OFFICERS

The following tables present certain information regarding the Board of Trustees and officers of the Trust. None of the Trustees are an “interested person” of the Trust, the Adviser, another investment adviser of a series of the Trust, or Foreside Funds Distributors LLC, the principal underwriter of the Trust (“Underwriter”), within the meaning of the 1940 Act and each Trustee is referred to as an “Independent Trustee” and is listed under such heading below. Employees of certain service providers to the Trust serve as officers of the Trust; such persons are not compensated by the Fund. The address of each Trustee and officer as it relates to the Trust’s business is 301 Bellevue Parkway, 2nd Floor, Wilmington, DE 19809.

Name and Date of Birth	Position(s) Held with Trust	Term of Office and Length of Time Served	Principal Occupation(s) During Past Five Years	Number of Funds in Trust Complex Overseen by Trustee	Other Directorships Held by Trustee
INDEPENDENT TRUSTEES					
Robert J. Christian Date of Birth: 2/49	Trustee and Chairman of the Board	Shall serve until death, resignation or removal. Trustee and Chairman since 2007.	Retired since February 2006; Executive Vice President of Wilmington Trust Company from February 1996 to February 2006; President of Rodney Square Management Corporation (“RSMC”) (investment advisory firm) from 1996 to 2005; Vice President of RSMC 2005 to 2006.	44	Optimum Fund Trust (registered investment company with 6 portfolios).
Iqbal Mansur Date of Birth: 6/55	Trustee	Shall serve until death, resignation or removal. Trustee since 2007.	University Professor, Widener University.	44	None.
Nicholas M. Marsini, Jr. Date of Birth: 8/55	Trustee	Shall serve until death, resignation or removal. Trustee since 2016.	Retired since March 2016. President of PNC Bank Delaware from June 2011 to March 2016; Executive Vice President of Finance of BNY Mellon from July 2010 to January 2011; Executive Vice President and Chief Financial Officer of PNC Global Investment Servicing from September 1997 to July 2010.	44	Brinker Capital Destinations Trust (registered investment company with 10 portfolios).
Nancy B. Wolcott Date of Birth: 11/54	Trustee	Shall serve until death, resignation or removal. Trustee since 2011.	Retired since May 2014; EVP, Head of GFI Client Service Delivery, BNY Mellon from January 2012 to May 2014; Head of US Funds Services, BNY Mellon, from July 2010 to January 2012; President of PNC Global Investment Servicing from 2008 to July 2010; Chief Operating Officer of PNC Global Investment Servicing from 2007 to 2008; Executive Vice President of PFPC Worldwide Inc. from 2006 to 2007.	44	Lincoln Variable Insurance Products Trust (registered investment company with 97 portfolios).

Name and Date of Birth	Position(s) Held with Trust	Term of Office and Length of Time Served	Principal Occupation(s) During Past Five Years	Number of Funds in Trust Complex Overseen by Trustee	Other Directorships Held by Trustee
Stephen M. Wynne Date of Birth: 1/55	Trustee	Shall serve until death, resignation or removal. Trustee since 2009.	Retired since December 2010; Chief Executive Officer of US Funds Services, BNY Mellon Asset Servicing from July 2010 to December 2010; Chief Executive Officer of PNC Global Investment Servicing from March 2008 to July 2010; President, PNC Global Investment Servicing from 2003 to 2008.	44	Copeland Trust (registered investment company with 3 portfolios).

EXECUTIVE OFFICERS

Name and Date of Birth	Position(s) Held with Trust	Term of Office and Length of Time Served	Principal Occupation(s) During Past Five Years
Joel L. Weiss Date of Birth: 1/63	President and Chief Executive Officer	Shall serve until death, resignation or removal. Officer since 2007.	President of JW Fund Management LLC since June 2016; Vice President and Managing Director of BNY Mellon Investment Servicing (US) Inc. and predecessor firms from 1993 to June 2016.
T. Richard Keyes Date of Birth: 1/57	Treasurer and Chief Financial Officer	Shall serve until death, resignation or removal. Officer since 2016.	President of TRK Fund Consulting LLC since July 2016; Head of Tax — U.S. Fund Services of BNY Mellon Investment Servicing (US) Inc. and predecessor firms from February 2006 to July 2016.
Gabriella Mercincavage Date of Birth: 6/68	Assistant Treasurer	Shall serve until death, resignation or removal. Officer since 2019.	Fund Administration Consultant since January 2019; Fund Accounting and Tax Compliance Accountant to financial services companies from November 2003 to July 2018.
Vincenzo A. Scarduzio Date of Birth: 4/72	Secretary	Shall serve until death, resignation or removal. Officer since 2012.	Director and Vice President Regulatory Administration of The Bank of New York Mellon and predecessor firms since 2001.
David C. Lebisky Date of Birth: 5/72	Chief Compliance Officer and Anti-Money Laundering Officer	Shall serve until death, resignation or removal. Officer since 2015.	President of Lebisky Compliance Consulting LLC since October 2015; Consultant, Duff & Phelps, LLC since 2016; Senior Consultant, Freeh Group International Solutions, LLC (a global risk management firm) from 2015 to 2018; Scotia Institutional Investments US, LP, Director of Regulatory Administration from 2010 to 2014.

LEADERSHIP STRUCTURE AND RESPONSIBILITIES OF THE BOARD AND ITS COMMITTEES. The basic responsibilities of the Trustees are to monitor the Trust and its funds' financial operations and performance, oversee the activities and legal compliance of the Adviser and other major service providers, keep themselves informed and exercise their business judgment in making decisions important to the Trust's proper functioning based on what the Trustees reasonably believe to be in the best interests of the shareholders. The Board of Trustees is comprised of five individuals, each of whom is an Independent Trustee. The Board of Trustees meets multiple times during the year (but at least quarterly) to review the investment performance of the funds and other operational matters, including policies and procedures with respect to compliance with regulatory and other requirements.

The Board of Trustees has appointed an Independent Trustee to serve in the role of Chairman. The Chairman's primary role is to participate in the preparation of the agenda for meetings of the Board of Trustees and the identification of information to be presented to the Board of Trustees with respect to matters to be acted upon by the Board of Trustees. The Chairman also presides at all meetings of the Board of Trustees and acts as a liaison with service providers, officers, attorneys and other Trustees generally between meetings. The Chairman may perform such other functions as may be requested by the Board of Trustees from time to time. Except for any duties specified herein or pursuant to the Trust's Declaration of Trust or By-Laws, the designation of Chairman does not impose on such Independent Trustee any duties, obligations or liability that is greater than the duties, obligations or liability imposed on such person as a member of the Board, generally.

Each Trustee was appointed to serve on the Board of Trustees because of his or her experience, qualifications, attributes and/or skills as set forth in the subsection "Trustee Qualifications," below. Based on a review of the Board of Trustees and its function, the Trustees have determined that the leadership structure of the Board of Trustees is appropriate and that the Board's role in the risk oversight of the Trust, as discussed below, allows the Board of Trustees to effectively administer its oversight function.

The Board of Trustees has an Audit Committee and a Nominating and Governance Committee. The responsibilities of each committee and its members are described below.

AUDIT COMMITTEE. The Audit Committee is comprised of Messrs. Mansur, Marsini and Wynne, each of whom is an Independent Trustee. Mr. Wynne serves as the chairman of the Audit Committee. The Board of Trustees has adopted a written charter (the "Audit Committee Charter") for the Audit Committee. Pursuant to the Audit Committee Charter, the Audit Committee has the responsibility, among others, to (1) select the Trust's independent registered public accountants; (2) review and approve the scope of the independent registered public accountants' audit activity; (3) oversee the audit process of the financial statements which are the subject of the independent registered public accountants' certifications; and (4) review with such independent registered public accountants the adequacy of the Trust's basic accounting system and the effectiveness of the Trust's internal accounting controls. The Audit Committee meets at least two times per year. The Audit Committee met four times during the Fund's fiscal year ended April 30, 2019.

NOMINATING AND GOVERNANCE COMMITTEE. The Nominating and Governance Committee is comprised of Messrs. Mansur, Marsini and Ms. Wolcott. Mr. Mansur serves as the chairman of the Nominating and Governance Committee. The Board of Trustees has adopted a written charter for the Nominating and Governance Committee. The Nominating and Governance Committee is responsible for formulating a statement of corporate governance; assessing the size, structure and composition of the Board of Trustees; determining trustee qualification guidelines as well as compensation, insurance and indemnification of Trustees; identifying Trustee candidates; oversight of Board of Trustees self-evaluations; reviewing certain regulatory and corporate matters of the Trust; and identifying, from time to time, qualified candidates to serve as the CCO for the Trust. The Nominating and Governance Committee meets at least once a year. The Nominating and Governance Committee met two times during the Fund's fiscal year ended April 30, 2019. The Nominating and Governance Committee identifies potential nominees in accordance with its Statement of Policy on Qualifications for Board of Trustees Membership. The Nominating and Governance Committee will consider nominee candidates recommended by shareholders. Shareholders who wish to recommend individuals for consideration by the Nominating and Governance Committee as nominee candidates may do so by submitting a written recommendation to the Secretary of the Trust at: 301 Bellevue Parkway, 2nd Floor, Wilmington, DE 19809. Submissions must include sufficient biographical information concerning the recommended individual, including age, at least ten years of employment history with employer names and a description of the employer's business, and a list of board memberships (if any). The submission must be accompanied by a written consent of the individual to stand for election if nominated by the Board of Trustees and to serve if elected. Recommendations must be received in a sufficient time, as determined by the Nominating and Governance Committee in its sole discretion, prior to the date proposed for the consideration of nominee candidates by the Board of Trustees. Upon the written request of shareholders holding at least a 5% interest in the Trust's shares in the aggregate, the Secretary shall present to any special meeting of shareholders such nominees for election as trustees as specified in such written request.

TRUSTEE QUALIFICATIONS. The following is a brief discussion of the experience, qualifications, attributes and/or skills that led to the Board of Trustees' conclusion that each individual identified below is qualified to serve as a Trustee of the Trust.

The Board of Trustees believes that the Trustees' ability to review critically, evaluate, question and discuss information provided to them, to interact effectively with the Adviser, other service providers, counsel and independent auditors, and to exercise effective business judgment in the performance of their duties, support the conclusion that each Trustee is qualified to serve as a Trustee of the Trust. In addition, the following specific experience, qualifications, attributes and/or skills apply as to each Trustee: Mr. Marsini is the former President of PNC Bank Delaware, former Executive Vice President of Finance of BNY Mellon, former Chief Financial Officer of PNC Global Investment Servicing and currently serves as a Director of another mutual fund complex; Mr. Wynne is the former Chief Executive Officer of US Funds Services, BNY Mellon Asset Servicing, former Chief Executive Officer of PNC Global Investment Servicing and currently serves as a Director of another mutual fund complex; Ms. Wolcott is the former Executive Vice President of US Fund Services, BNY Mellon Asset Servicing, former President of PNC Global Investment Servicing and currently serves as a Trustee of another mutual fund complex; Mr. Christian served as the Executive Vice President of Wilmington Trust and currently serves as the Trustee to other mutual fund complexes; and Mr. Mansur is a Professor of Finance, School of Business Administration, at Widener University.

In its periodic self-assessment of the effectiveness of the Board of Trustees, the Board of Trustees considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the Trust and its funds. The summaries set forth above as to the experience, qualifications, attributes and/or skills of the Trustees do not constitute holding out the Board of Trustees or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board of Trustees as a whole than would otherwise be the case.

RISK OVERSIGHT. Through its direct oversight role, and indirectly through its Committees, of officers and service providers, the Board of Trustees performs a risk oversight function for the Trust and its funds consisting, among other things, of the following activities: (1) at regular and special Board meetings, and on an ad hoc basis as needed, receiving and reviewing reports related to the performance and operations of the Trust and its funds; (2) reviewing and approving, as applicable, the compliance policies and procedures of the Trust; (3) meeting with the portfolio management team to review investment strategies, techniques and the processes used to manage related risks; (4) meeting with representatives of key service providers, including the investment advisers, administrator, the distributor, the transfer agent, the custodian and the independent registered public accounting firms of the funds, to review and discuss the activities of the Trust and its funds and to provide direction with respect thereto; and (5) engaging the services of the Chief Compliance Officer of the Trust to test the compliance procedures of the Trust and its service providers.

SECURITY AND OTHER INTERESTS. The following table sets forth the equity securities in the Fund and in all registered investment companies overseen by the Trustees within the Trust Complex that the Trustees beneficially owned as of December 31, 2018.

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee within the Family of Investment Companies
Independent Trustees		
Robert J. Christian	None	Over \$100,000
Iqbal Mansur	None	Over \$100,000
Nicholas M. Marsini Jr.	None	None
Nancy B. Wolcott	None	None
Stephen M. Wynne	None	\$50,001 - \$100,000

As of December 31, 2018, none of the Independent Trustees, or any of their immediate family members (i.e., spouse or dependent children) served as an officer, director or was an employee of the Trust, the Adviser or the Underwriter, or of any of their respective affiliates. Nor do any of such persons serve as an officer or director or is an employee of any company controlled by or under common control with such entities. Additionally, as of the same date, none of the Independent Trustees or any of their immediate family members (i.e., spouse or dependent children) owned beneficially or of record any interest in the Adviser or the Underwriter, or in any person directly or indirectly controlling, controlled by, or under common control with such entities.

COMPENSATION. In addition to the fees below, the Trust reimburses the Trustees for their related business expenses. The following table sets forth the aggregate compensation paid to each of the Trustees for the fiscal year ended April 30, 2019.

Name of Trustee	Aggregate Compensation from the Trust	Pension or Retirement Benefits Accrued as Part of the Trust's Expenses	Estimated Annual Benefits upon Retirement	Total Compensation from the Trust Complex
Robert J. Christian	\$ 114,250	\$ 0	\$ 0	\$ 114,250
Nicholas M. Marsini Jr.	\$ 104,750	\$ 0	\$ 0	\$ 104,750
Iqbal Mansur	\$ 100,750	\$ 0	\$ 0	\$ 100,750

CODE OF ETHICS

In accordance with Rule 17j-1 of the 1940 Act, each of the Trust and the Adviser has adopted a code of ethics (each, a “Code” and together, the “Codes”).

The Codes are intended to prohibit or restrict transactions that may be deemed to create a conflict of interest among the Adviser or the Trust. Each Code identifies the specific employees, officers or other persons who are subject thereto and all are required to abide by the provisions thereunder. Persons covered under the Codes may engage in personal trading for their own accounts, including securities that may also be purchased or held or traded by the Fund under certain circumstances.

Under the Code adopted by the Trust, personal trading is subject to specific restrictions, limitations, guidelines and other conditions. Under the Code adopted by the Adviser, personal trading is subject to pre-clearance and other conditions set forth in its Code.

On an annual basis or whenever deemed necessary, the Board of Trustees reviews reports regarding all of the Codes including information about any material violations of the Codes. The Codes are on public file as exhibits to the Trust’s registration statement with the SEC.

PROXY VOTING

The Board of Trustees has adopted the Adviser’s proxy voting procedures and has delegated the responsibility for exercising the voting rights associated with the securities purchased and/or held by the Fund to the Adviser, subject to the Board of Trustees’ continuing oversight. In exercising its voting obligations, the Adviser is guided by general fiduciary principles. It must act prudently, solely in the interest of the Fund, and for the purpose of providing benefits to the Fund. The Adviser will consider the factors that could affect the value of the Fund’s investment in its determination on a vote.

The Adviser’s proxy voting procedures establish a protocol for voting of proxies in cases in which the Adviser or an affiliated entity has an interest that is reasonably likely to be affected by a proxy to be voted on behalf of the Fund or that could compromise the Adviser’s independence of judgment and action in voting the proxy in the best interest of the Fund’s shareholders. The Adviser believes that consistently voting in accordance with its stated guidelines will address most conflicts of interest, and to the extent any deviation of such guidelines occurs it will be carefully assessed by a securities review committee to determine if a conflict of interest exists, and if a material conflict of interest exists, the committee will determine an appropriate resolution, which may include consultation with management or Trustees of the Trust, analyses by independent third parties, or other means necessary to ensure and demonstrate the proxy was voted in the best interests of shareholders. The proxy voting policies and procedures of the Adviser are attached herewith as Appendix B. The Fund is required to file annually its proxy voting record on Form N-PX with the SEC. Form N-PX is required to be filed by August 31 of each year and when filed will be available by request by calling the Fund at (888) 201-5799 or on the SEC’s website at www.sec.gov.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of the Fund. Any person who directly or indirectly owns 5% or more of the outstanding voting securities of the Fund, may be deemed an “affiliated person” of the Fund, as such term is defined in the 1940 Act. A control person is one who owns, either directly or indirectly more than 25% of the voting securities of a company or acknowledges the existence of control. As of August 2, 2019, the following persons were the only persons who were record owners (or to the knowledge of the Trust, beneficial owners) of 5% or more of the outstanding shares of any class of the Fund. Additionally, as of the same date, none of the Trustees and officers of the Trust owned individually and together in excess of 1% of any class of outstanding shares of the Fund.

INVESTMENT ADVISORY SERVICES

EquityCompass Investment Management, LLC (“EquityCompass” or the “Adviser”) is a registered investment adviser located at One South Street, Baltimore, MD 21202. The Adviser was formed in 2007 and registered with the SEC as an investment adviser in May 2008; it is a wholly-owned subsidiary of Stifel Financial Corp. (NYSE: SF). In addition to serving as investment adviser to the Fund, EquityCompass offers a broad range of portfolio strategies based on its research driven, rules-based investment process which merges traditional investment theory with quantitative techniques. EquityCompass portfolio strategies are provided to other financial institutions as model portfolios or through investment vehicles such as structured notes or similar equity-linked instruments. Model portfolios are used by the receiving financial institutions (wrap program sponsors) to manage their own wrap accounts. As of June 30, 2019, EquityCompass provided portfolio strategies with respect to assets of approximately \$4.2 billion. The Adviser, subject to the general oversight of the Trust’s Board of Trustees, has overall responsibility for directing the investments of the Fund in accordance with its investment objective, policies and limitations.

Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser, the Adviser, subject to the general oversight of the Board of Trustees, has overall responsibility for directing the investments of the Fund in accordance with its investment objective, policies and limitations (the “Investment Advisory Agreement”). The Investment Advisory Agreement has an initial term of two years and continues in effect from year to year thereafter if such continuance is specifically approved at least annually by the Board of Trustees including a majority of the Independent Trustees casting votes in person at a meeting called for such purpose, or by vote of a majority of the outstanding voting securities of the Fund. The Investment Advisory Agreement may be terminated by the Fund on 60 days’ written notice to the Adviser without penalty or by the Adviser on 90 days’ written notice to the Trust without penalty. The Investment Advisory Agreement will also terminate automatically in the event of its assignment as defined in the 1940 Act.

Pursuant to the Investment Advisory Agreement, the Adviser is entitled to receive an annual investment advisory fee, paid monthly, of 0.60% of the average daily net assets of the Fund. The Adviser has contractually agreed to reduce its investment advisory fee and/or reimburse certain expenses of the Fund to the extent necessary to ensure that the Fund’s total operating expenses (excluding taxes, fees and expenses attributable to a distribution or service plan adopted by the Trust, “Acquired Fund Fees and Expenses,” interest, extraordinary items and brokerage commissions) do not exceed 0.99% of average daily net assets of the Fund (the “Expense Limitation”). The Expense Limitation will remain in effect until August 31, 2020, unless the Board of Trustees of FundVantage Trust (the “Trust”) approves its earlier termination. The Adviser is entitled to recover, subject to approval by the Board of Trustees, such amounts reduced or reimbursed for a period of up to three (3) years from the date on which the Adviser reduced its compensation and/or assumed expenses for the Fund. The Adviser is permitted to seek reimbursement from the Fund, subject to certain limitations, for fees it waived and Fund expenses it paid to the extent the total annual fund operating expenses do not exceed the limits described above or any lesser limits in effect at the time of reimbursement. No recoupment will occur unless the Fund’s expenses are below the Expense Limitation amount.

The following tables set forth the aggregate fees paid to the Adviser by the Fund for services rendered during the fiscal years ended April 30, 2017, April 30, 2018 and April 30, 2019:

For the Fiscal Year Ended April 30, 2019

Gross Advisory Fees Earned	Advisory Fee Waivers and Expenses Waived or Reimbursed	Net Advisory Fees
\$ 432,089	\$ (125,818)	\$ 306,271

For the Fiscal Year Ended April 30, 2018

Gross Advisory Fees Earned	Advisory Fee Waivers and Expenses Waived or Reimbursed	Net Advisory Fees
\$ 441,783	\$ (55,487)	\$ 386,296

For the Fiscal Year Ended April 30, 2017

Gross Advisory Fees Earned	Advisory Fee Waivers and Expenses Waived or Reimbursed	Net Advisory Fees
\$ 393,374	\$ (74,701)	\$ 318,673

Under the terms of the Investment Advisory Agreement, the Adviser agrees to: (a) direct the investments of the Fund, subject to and in accordance with the Fund's investment objective, policies and limitations set forth in the Prospectus and this SAI; (b) purchase and sell for the Fund, securities and other investments consistent with the Fund's objective and policies; (c) supply office facilities, equipment and personnel necessary for servicing the investments of the Fund; (d) pay the salaries of all personnel of the Adviser performing services relating to research, statistical and investment activities on behalf of the Trust; (e) make available and provide such information as the Trust and/or its administrator may reasonably request for use in the preparation of its registration statement, reports and other documents required by any applicable federal, foreign or state statutes or regulations; and (f) make its officers and employees available to the Trustees and officers of the Trust for consultation and discussion regarding the management of the Fund and its investment activities. Additionally, the Adviser agrees to create and maintain all necessary records in accordance with all applicable laws, rules and regulations pertaining to the various functions performed by it and not otherwise created and maintained by another party pursuant to contract with the Fund.

The Investment Advisory Agreement provides that the Adviser shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Fund in connection with the matters to which the agreement relates, except to the extent of a loss resulting from willful misfeasance, bad faith or gross negligence on its part in the performance of its obligations and duties under the agreement.

The salaries of all personnel of the Adviser performing services for the Fund relating to research, statistical and investment activities are paid by the Adviser.

The front-end sales load reallocated to dealers as a percentage of the offering price of the Fund's Class A shares is described in the Fund's Prospectus.

As set forth above, EquityCompass is a wholly owned subsidiary of Stifel Financial Corp. ("Stifel"), which is located at 501 North Broadway, St. Louis, MO 63102. Stifel Financial Corp. is a financial services holding company headquartered in St. Louis, Missouri, that conducts its banking, securities, and financial services business through several subsidiaries. Stifel clients are served through its various subsidiaries, including, but not limited to, Stifel, Nicolaus & Company, Incorporated, Keefe, Bruyette & Woods, Inc., Ziegler Capital Management, LLC, EquityCompass Investment Management, LLC, Century Securities Associates, Inc. and Washington Crossing Advisers, LLC in the U.S. and through Stifel Nicolaus Europe Limited in the United Kingdom and Europe.

PORTFOLIO MANAGERS

The management of the Fund is the responsibility of a group of investment professionals employed by the Adviser. The information provided below supplements the information provided in the Prospectus under the heading "Portfolio Managers" with respect to the investment professionals responsible for the day-to-day management of the Fund, including information regarding:

- (i) "Other Accounts Managed." Other accounts managed by Michael Scherer, Thomas P. Mulroy and Larry Baker, who are the portfolio managers primarily responsible for the day-to-day management of the Fund, as of April 30, 2019;

- (ii) “Material Conflicts of Interest.” Material conflicts of interest identified by the Adviser that may arise in connection with a portfolio manager’s management of the Fund’s investments and investments of other accounts managed. These potential conflicts of interest include material conflicts between the investment strategy of the Fund and the investment strategy of the other accounts managed by the portfolio manager and conflicts associated with the allocation of investment opportunities between the Fund and other accounts managed by the portfolio manager. *Additional conflicts of interest may potentially exist or arise that are not discussed below;*
- (iii) “Compensation.” A description of the structure of and method used to determine the compensation received by the Fund’s portfolio managers from the Fund, the Adviser or any other source with respect to managing the Fund and any other accounts as of April 30, 2019; and
- (iv) “Ownership of Securities.” Information regarding each portfolio manager’s dollar range of equity securities beneficially owned in the Fund as of April 30, 2019.

Other Accounts Managed. The table below includes details regarding the number of other registered investment companies, other pooled investment vehicles and other accounts managed by Mr. Scherer, Mr. Mulroy and Mr. Baker, total assets under management for each type of account and total assets in each type of account with performance-based advisory fees as of April 30, 2019.

Types of Accounts	Total Number of Accounts Managed	Total Assets (million)	Number of Accounts Managed subject to a Performance Based Advisory Fee	Total Asset Managed subject to a Performance Based Advisory Fee (million)
Michael Scherer				
Registered Investment Companies	0	\$ 0	0	\$ 0
Other Pooled Investment Vehicles	18	\$ 11.9	0	\$ 0
Other Accounts	0	\$ 0	0	\$ 0
Thomas P. Mulroy				
Registered Investment Companies	0	\$ 0	0	\$ 0
Other Pooled Investment Vehicles	11	\$ 8.2	0	\$ 0
Other Accounts	0	\$ 0	0	\$ 0
Larry Baker				
Registered Investment Companies	0	\$ 0	0	\$ 0
Other Pooled Investment Vehicles	11	\$ 8.2	0	\$ 0
Other Accounts	0	\$ 0	0	\$ 0

Material Conflicts Of Interest. The Adviser may provide advisory services to other clients which invest in securities of the same type that the Fund invests in (i.e., equity securities). These may in the future include certain managed accounts which are affiliates of the Adviser. The Adviser is aware of its obligation to ensure that when orders for the same securities are entered on behalf of the Fund and other accounts, that the Fund receives fair and equitable allocation of these orders, particularly where affiliated accounts may participate. In the event the Adviser manages accounts other than the Fund in the future, the Adviser will attempt to mitigate potential conflicts of interest by adopting policies and procedures regarding trade execution, brokerage allocation and order aggregation which provides a methodology for ensuring fair treatment for all clients in situations where orders cannot be completely filled or filled at different prices.

Compensation. The Adviser compensates the Fund’s portfolio managers for their management of the Fund. Each portfolio manager’s compensation is comprised of a fixed base salary and a discretionary bonus that is based on the portfolio manager’s individual performance, his contribution to overall Adviser performance as well as the Adviser’s net revenues for the year. In assessing a portfolio manager’s performance, the Adviser considers the investment performance of the portfolio strategies for which such portfolio manager is responsible, measured on a pre-tax basis, over the 1-, 3- and 5-year time horizons (as applicable).

Ownership of Securities. The following table sets forth the dollar range of equity securities beneficially owned by, Michael Scherer, Thomas P. Mulroy and Larry Baker in the Fund as of April 30, 2019.

Name of Portfolio Manager	Dollar Range of Equity Securities of the Fund
Michael Scherer	\$100,001 - \$500,000
Thomas P. Mulroy	None
Larry Baker	\$100,001 - \$500,000

ADMINISTRATION AND ACCOUNTING SERVICES

Pursuant to an Administration and Accounting Services Agreement dated July 19, 2007, The Bank of New York Mellon performs certain administrative services for the Trust including, among other things, assisting in the preparation of the annual post-effective amendments to the Trust's registration statement, assisting in obtaining the fidelity bond and trustees' and officers' errors and omissions insurance policies, preparing notices, agendas and resolutions for quarterly Board of Trustees meetings, maintaining the Trust's corporate calendar, maintaining Trust contract files and providing executive and administrative services to support the Independent Trustees. The Bank of New York Mellon also performs certain administrative and accounting services for the Trust such as preparing shareholder reports, providing statistical and research data, assisting the Adviser in compliance monitoring activities and preparing and filing federal and state tax returns on behalf of the Trust. In addition, The Bank of New York Mellon prepares and files certain reports with the appropriate regulatory agencies and prepares certain materials required by the SEC or any state securities commission having jurisdiction over the Trust. The accounting services performed by The Bank of New York Mellon include determining the NAV per share of the Fund and maintaining records relating to the securities transactions of the Fund.

The table below sets forth the net administration and accounting service fees paid by the Fund to The Bank of New York Mellon for services rendered the fiscal years ended April 30, 2017, April 30, 2018 and April 30, 2019:

	Fiscal Year Ended April 30, 2019	Fiscal Year Ended April 30, 2018	Fiscal Year Ended April 30, 2017
Administration and Accounting Fee	\$ 65,360	\$ 66,136	\$ 67,410

ADDITIONAL SERVICE PROVIDERS

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM. Ernst & Young LLP, One Commerce Square, Suite 700, 2005 Market Street, Philadelphia, PA 19103, serves as the independent registered public accounting firm to the Fund.

LEGAL COUNSEL. Pepper Hamilton LLP, 3000 Two Logan Square, 18th and Arch Streets, Philadelphia, PA 19103, serves as counsel to the Trust.

CUSTODIAN. The Bank of New York Mellon (the "Custodian"), 240 Greenwich Street, New York, NY 10286, serves as the Fund's custodian. The Custodian's services include, in addition to the custody of all cash and securities owned by the Trust, the maintenance of custody accounts in the Custodian's trust department, the segregation of all certificated securities owned by the Trust, the appointment of authorized agents as sub-custodians, disbursement of funds from the custody accounts of the Trust, releasing and delivering securities from the custody accounts of the Trust, maintaining records with respect to such custody accounts, delivering to the Trust a daily and monthly statement with respect to such custody accounts and causing proxies to be executed. The Fund has made arrangements with BNY Mellon Servicing Trust Company to serve as custodian for Individual Retirement Accounts ("IRAs").

TRANSFER AGENT. BNY Mellon Investment Servicing (US) Inc. ("BNY Mellon Investment Servicing"), 4400 Computer Drive, Westborough, MA 01581, serves as the Trust's Transfer Agent and Dividend Paying Agent.

OTHER SERVICE PROVIDERS. The Trust has engaged JW Fund Management, LLC, 100 Springdale Rd. Suite A3-416, Cherry Hill, NJ 08003 to provide persons to serve as Principal Executive Officer and Principal Financial Officer and provide various other services for the Trust. The Trust has engaged Duff & Phelps, LLC to provide on-going compliance services, including providing an individual to serve as the Chief Compliance Officer and Anti-Money Laundering Officer for the Trust.

BROKERAGE ALLOCATION AND OTHER PRACTICES

Subject to policies established by the Board of Trustees, the Adviser is primarily responsible for the execution of the Fund's portfolio transactions and the allocation of brokerage. The Adviser has no obligation to deal with any dealer or group of dealers in the execution of transactions in portfolio securities of the Fund. Where possible, the Adviser deals directly with the dealers who make a market in the securities involved except in those circumstances where better prices and execution are available elsewhere. It is the objective of the Adviser to obtain the best results in conducting portfolio transactions for the Fund, taking into account such factors as price (including the applicable dealer-spread or commission), the size, type and difficulty of the transaction involved, the firm's general execution and operations facilities and the firm's risk in positioning the securities involved. The cost of portfolio securities transactions of the Fund primarily consists of dealer or underwriter spreads and brokerage commissions.

While reasonable competitive spreads or commissions are sought, the Fund will not necessarily be paying the lowest spread or commission available. Subject to obtaining the best net results, dealers who provide supplemental investment research (such as quantitative and modeling information assessments and statistical data and provide other similar services) to the Adviser may receive orders for transactions by the Fund. Information so received will be in addition to and not in lieu of the services required to be performed by the Adviser under the Investment Advisory Agreement and the expense of the Adviser will not necessarily be reduced as a result of the receipt of such supplemental information. Supplemental investment research obtained from such dealers may be used by the Adviser in servicing all of its accounts and such research may or may not be useful to the Adviser in connection with the Fund. In addition, as permitted by Section 28(e) of the Securities Exchange Act of 1934, as amended, the Adviser may pay a broker-dealer that provides brokerage and research services an amount of commission for effecting a securities transaction for the Fund in excess of the commission that another broker-dealer would have charged for effecting that transaction if the amount is believed by the Adviser to be reasonable in relation to the value of the overall quality of the brokerage and research services provided. Other clients of the Adviser may indirectly benefit from the provision of these services to the Adviser, and the Fund may indirectly benefit from services provided to the Adviser as a result of transactions for other clients.

The Fund invests in securities traded in the over-the-counter markets, and the Fund intends to deal directly with dealers who make markets in the securities involved, except in those circumstances where better execution is available elsewhere. Under the 1940 Act, except as permitted by exemptive order or rule, persons affiliated with the Fund are prohibited from dealing with the Fund as principal in the purchase and sale of securities.

Securities held by the Fund may also be held by, or be appropriate investments for, other funds or investment advisory clients for which the Adviser or its affiliates act as an adviser. Because of different investment objectives or other factors, a particular security may be bought for an advisory client when other clients are selling the same security. If purchases or sales of securities by the Adviser for the Fund or other funds for which it acts as investment adviser or for other advisory clients arise for consideration at or about the same time, transactions in such securities will be made, insofar as are feasible, for the respective funds and clients in a manner deemed equitable to all. Transactions effected by the Adviser (or its affiliates) on behalf of more than one of its clients during the same period may increase the demand for securities being purchased or the supply of securities being sold, causing an adverse effect on price.

The Fund may at times invest in securities of its regular broker-dealers or a parent of their regular broker-dealers. During the fiscal year ended April 30, 2019, the Fund acquired no securities of its regular broker-dealers or a parent of its regular broker-dealers.

The table below sets forth the brokerage commissions paid by the Fund for the fiscal years ended April 30, 2017, April 30, 2018 and April 30, 2019:

	Fiscal Year Ended April 30, 2019	Fiscal Year Ended April 30, 2018	Fiscal Year Ended April 30, 2017
Brokerage Commissions Paid by the Fund	\$ 9,702	\$ 6,408	\$ 11,094

For the fiscal year ended April 30, 2019, the Fund did not pay any brokerage commission to an affiliate of the Trust.

ADDITIONAL COMPENSATION TO FINANCIAL INTERMEDIARIES

The additional compensation to financial intermediaries described in the Prospectus may be calculated based on factors determined by the Adviser and its affiliates from time to time, including: the value of the Fund's shares sold to, or held by, a financial intermediary's customers; gross sales of the Fund's shares by a financial intermediary; or a negotiated lump sum payment.

In addition to the additional cash payments to financial intermediaries described in the Prospectus, subject to applicable FINRA rules and regulations, the Adviser and its affiliates may provide compensation to financial intermediaries that may enable the Adviser and its affiliates to sponsor or participate in educational or training programs, sales contests and other promotions involving the sales representatives and other employees of financial intermediaries in order to promote the sale of the Fund's shares. The Adviser and its affiliates may also pay for the travel expenses, meals, lodging and entertainment of financial intermediaries and their sales representatives and other employees in connection with such educational or training programs, sales contests and other promotions. These payments may vary with each such event.

DISTRIBUTION OF SHARES AND RULE 12B-1 PLAN

Forside Funds Distributors LLC (the "Underwriter"), located at 899 Cassatt Road, 400 Berwyn Park, Suite 110, Berwyn, PA 19312, serves as a principal underwriter of the Fund's shares pursuant to an Underwriting Agreement with the Trust. Pursuant to the terms of the Underwriting Agreement, the Underwriter is continuously distributes shares of the Fund on a best efforts basis. The Underwriter has no obligation to sell any specific quantity of shares of the Fund. The Underwriter and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Fund.

To the extent that the Underwriter receives fees under the Fund’s Plan of Distribution adopted pursuant to Rule 12b-1 under the 1940 Act (the “12b-1 Plan”), the Underwriter will furnish or enter into arrangement with others for the furnishing of marketing or sales services with respect to the Class A shares and Class C shares as may be required pursuant to such plan. Moreover, to the extent that the Underwriter receives shareholder service fees under any shareholder services plan adopted by the Fund, the Underwriter will enter into arrangements with others for the furnishing of personal or account maintenance services with respect to the relevant shareholders of the Fund as may be required pursuant to such plan. The Underwriter receives no underwriting commissions or Rule 12b-1 fees in connection with the sale of the Fund’s Institutional Class shares. The Trustees of the Trust, including a majority of Independent Trustees, have determined that there is a reasonable likelihood that the 12b-1 Plan will benefit the Trust, the Fund and the shareholders of the Fund’s Class A shares and Class C shares.

The Underwriter may enter into agreements with selected broker-dealers, banks or other financial institutions for distribution of shares of the Fund. With respect to certain financial institutions and related Fund “supermarket” platform agreements, the Fund and/or the Adviser, rather than the Underwriter, typically enter into such agreements. These financial institutions may charge a fee for their services and may receive shareholder service or other fees from the Adviser and/or the Fund. These financial institutions may otherwise act as processing agents and are responsible for transmitting purchase, redemption and other requests to the Fund.

The Underwriter received the following aggregate commissions on sales of Class A shares and Class C shares of the Fund during the fiscal years ended April 30, 2017, April 30, 2018 and April 30, 2019:

	Fiscal Year Ended April 30, 2019	Fiscal Year Ended April 30, 2018	Fiscal Year Ended April 30, 2017
Class A Shares	\$ 0	\$ 0	\$ 0
Class C Shares	\$ 0	\$ 0	\$ 0

The Underwriter received the following concessions on sales of Class A shares and Class C shares of the Fund during the fiscal years ended April 30, 2017, April 30, 2018 and April 30, 2019:

	Fiscal Year Ended April 30, 2019	Fiscal Year Ended April 30, 2018	Fiscal Year Ended April 30, 2017
Class A Shares	\$ 0	\$ 0	\$ 0
Class C Shares	\$ 0	\$ 0	\$ 0

The Underwriting Agreement continues in effect for successive annual periods provided such continuance is approved at least annually by a majority of the Trustees, including a majority of the Independent Trustees. The Underwriting Agreement provides that the Underwriter, in the absence of willful misfeasance, bad faith or negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the agreement, will not be liable to the Fund or its shareholders for losses arising in connection with the sale of Fund shares.

The Underwriting Agreement terminates automatically in the event of an assignment. The Underwriting Agreement is also terminable without payment of any penalty with respect to the Fund (i) (by vote of a majority of the Trustees of the Trust who are not interested persons of the Trust and who have no direct or indirect financial interest in the operation of any 12b-1 Plan of the Fund or any agreements related to a 12b-1 Plan, or by vote of a majority of the outstanding voting securities of the Fund) on sixty (60) days’ written notice to the Underwriter; or (ii) by the Underwriter on sixty (60) days’ written notice to the Fund. The Underwriter will be compensated for distribution services according to the 12b-1 Plan regardless of the Underwriter’s expenses. The Underwriter uses the entire 12b-1 for distribution expenses and does not retain any amounts for profit. The Underwriter does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a 12b-1 Plan is effective. The Adviser pays the Underwriter a fee for certain distribution-related services.

The 12b-1 Plan provides that the Underwriter will be paid for distribution activities such as public relations services, telephone services, sales presentations, media charges, preparation, printing and mailing advertising and sales literature, data processing necessary to support a distribution effort and printing and mailing of prospectuses to prospective shareholders. Additionally, the Underwriter may pay certain financial institutions such as banks or broker-dealers who have entered into servicing agreements with the Underwriter and other financial institutions for distribution and shareholder servicing activities.

The 12b-1 Plan further provides that payment shall be made for any month only to the extent that such payment does not exceed 0.25% on an annualized basis of the Class A shares and 1.00% (0.75% distribution fee and 0.25% shareholder service fee) on an annualized basis of the Class C shares of the Fund’s average net assets, except with respect to limitations set from time to time by the Board of Trustees.

Under the 12b-1 Plan, if any payments made by the Adviser out of its advisory fee, not to exceed the amount of that fee, to any third parties (including banks), including payments for shareholder servicing and transfer agent functions, were deemed to be indirect financing by the Fund of the distribution of its Class A shares and Class C shares, such payments are authorized. The Fund may execute portfolio transactions with and purchase securities issued by depository institutions that receive payments under the 12b-1 Plan. No preference for instruments issued by such depository institutions is shown in the selection of investments.

The following table sets forth the distribution fees received by the Underwriter for the fiscal years ended April 30, 2017, April 30, 2018 and April 30, 2019:

Rule 12b-1 Distribution Fees	Fiscal Year Ended April 30, 2019	Fiscal Year Ended April 30, 2018	Fiscal Year Ended April 30, 2017
Class A Shares	\$ 96,671	\$ 97,657	\$ 92,598
Class C Shares	\$ 178,718	\$ 189,183	\$ 187,198

The following table sets forth the service fees received by the Underwriter for the fiscal years ended April 30, 2017, April 30, 2018 and April 30, 2019:

Rule 12b-1 Shareholder Service Fees	Fiscal Year Ended April 30, 2019	Fiscal Year Ended April 30, 2018	Fiscal Year Ended April 30, 2017
Class A Shares	\$ 0	\$ 0	\$ 0
Class C Shares	\$ 59,573	\$ 63,061	\$ 62,399

During the fiscal year ended April 30, 2019, the Underwriter incurred the following expenses in connection with distribution under the 12b-1 Plan:

	Advertising	Printing and Mailing of Prospectuses to other Than Current Shareholders	Compensation to Underwriters	Compensation to Broker- Dealers	Compensation to Sales Personnel	Interest, Carrying or other Financing Charges
Class A	\$ 0	\$ 0	\$ 0	\$ 96,709	\$ 0	\$ 0
Class C	\$ 0	\$ 0	\$ 0	\$ 238,361	\$ 0	\$ 0

CAPITAL STOCK AND OTHER SECURITIES

The Trust issues and offers separate classes of shares of the Fund: Class A shares, Class C shares and Institutional Class shares. The shares of the Fund, when issued and paid for in accordance with the Prospectus, will be fully paid and non-assessable shares, with equal voting rights and no preferences as to conversion, exchange, dividends, redemption or any other feature.

The separate classes of shares of the Fund represent interests in the same portfolio of investments, have the same rights and are identical in all respects, except that Class A shares and Class C shares bear Rule 12b-1 distribution expenses and have exclusive voting rights with respect to the 12b-1 Plan pursuant to which the distribution fee may be paid.

The net income attributable to a class of shares and the dividends payable on such shares will be reduced by the amount of any applicable shareholder service or Rule 12b-1 distribution fees. Accordingly, the NAV of the Class A shares and Class C shares will be reduced by such amount to the extent the Fund has undistributed net income.

Shares of the Fund entitle holders to one vote per share and fractional votes for fractional shares held. Shares have non-cumulative voting rights, do not have preemptive or subscription rights and are transferable. Each class takes separate votes on matters affecting only that class.

The Fund does not hold annual meetings of shareholders. The Trustees are required to call a meeting of shareholders for the purpose of voting upon the question of removal of any Trustee when requested in writing to do so by the shareholders of record owning not less than 10% of the Fund's outstanding shares.

PURCHASE, REDEMPTION AND PRICING OF SHARES

PURCHASE OF SHARES. Information regarding the purchase of shares is discussed in the “Purchase of Shares” section of the Prospectus.

REDEMPTION OF SHARES. Information regarding the redemption of shares is discussed in the “Redemption of Shares” section of the Prospectus.

PRICING OF SHARES. For the Fund, the NAV per share of the Fund is determined by dividing the value of the Fund’s net assets by the total number of the Fund’s shares outstanding. This determination is made by The Bank of New York Mellon, as of the close of regular trading on the New York Stock Exchange (the “Exchange”) (typically 4:00 p.m., Eastern Time) each day the Fund is open for business. The Fund is open for business on days when the Exchange is open for business.

In valuing the Fund’s assets, a security listed on an exchange (and not subject to restrictions against sale by the Fund on an exchange) will be valued at its last sale price on the exchange on the day the security is valued. Lacking any sales on such day, the security will be valued at the mean between the closing asked price and the closing bid price. Securities listed on multiple exchanges (and not subject to restriction against sale by the Fund on such exchanges) will be similarly valued, using quotations on the exchange on which the security is traded most extensively. Unlisted securities that are quoted on the National Association of Securities Dealers’ National Market System, for which there have been sales of such securities on such day, shall be valued at the official closing price on such system on the day the security is valued. If there are no such sales on such day, the value shall be the mean between the closing asked price and the closing bid price. The value of such securities quoted on the NASDAQ Stock Market System, but not listed on the National Market System, shall be valued at the mean between the closing asked price and the closing bid price. Unlisted securities that are not quoted on the NASDAQ Stock Market System and for which over-the-counter market quotations are readily available will be valued at the mean between the current bid and asked prices for such security in the over-the-counter market. Other unlisted securities (and listed securities subject to restriction on sale) will be valued at fair value as determined in good faith under the direction of the Board of Trustees although the actual calculation may be done by others. Short-term investments with remaining maturities of less than 61 days are valued at amortized cost.

DIVIDENDS

The Fund intends to distribute substantially all of its net investment income, if any. Dividends from such net investment income are declared and paid quarterly to the shareholders. Distributions, if any, of net short-term capital gain and net capital gain (the excess of net long-term capital gain over the short-term capital loss) realized by the Fund, after deducting any available capital loss carryovers are declared and paid to its shareholders annually.

The Fund’s dividends and distributions are taxable to shareholders (other than retirement plans and other tax-exempt investors) whether received in cash or reinvested in additional shares of the Fund. A dividend or distribution paid by the Fund has the effect of reducing the NAV per share on the ex-dividend date by the amount of the dividend distribution. A dividend or distribution declared shortly after a purchase of shares by an investor would, therefore, represent, in substance, a return of capital to the shareholder with respect to such shares even though it would be subject to federal income tax. This is called “buying a dividend.” To avoid “buying a dividend,” check the Fund’s distribution dates before you invest.

A statement will be sent to you after the end of each year detailing the tax status of your distributions. Please see “Certain Material U.S. Federal Income Tax Considerations” below for more information on the federal income tax consequences of dividends and other distributions made by the Fund.

CERTAIN MATERIAL U.S. FEDERAL INCOME TAX CONSIDERATIONS

The following discussion summarizes certain material U.S. federal income tax considerations affecting the Fund and its shareholders. This discussion is for general information only and does not purport to consider all aspects of U.S. federal income taxation that might be relevant to beneficial owners of shares of the Fund. The summary discussion that follows may not be considered to be individual tax advice and may not be relied upon by any shareholder. The summary is based upon provisions of the IRC, applicable U.S. Treasury Regulations (whether temporary, proposed or final) promulgated thereunder (the “Regulations”), and administrative and judicial interpretations thereof, as are the in effect as of the date hereof, all of which are subject to change, which change could be retroactive, and may affect the conclusions expressed herein. The summary applies only to beneficial owners of shares of the Fund in whose hands such shares are capital assets within the meaning of Section 1221 of the IRC, and may not apply to certain types of beneficial owners of shares of the Fund, including, but not limited to insurance companies, tax-exempt organizations, shareholders holding the Fund’s shares through tax-advantaged accounts (such as an individual retirement account (an “IRA”), a 401(k) plan account, or other qualified retirement account), financial institutions, pass-through entities, broker-dealers, entities that are not organized under the laws of the United States or a political subdivision thereof, persons who are neither a citizen nor resident of the United States, shareholders holding the Fund’s shares as part of a hedge, straddle or conversion transaction, and shareholders who are subject to the alternative minimum tax. Persons who may be subject to tax in more than one country should consult the provisions of any applicable tax treaty to determine the potential tax consequences to them.

If an entity or arrangement treated as a partnership for U.S. federal income tax purposes holds the Fund's common stock, the U.S. federal income tax treatment of a partner in such partnership generally will depend upon the status of the partner and the activities of such partnership. A partner of a partnership holding the Fund's common stock should consult its own tax advisor regarding the U.S. federal income tax consequences to the partner of the acquisition, ownership and disposition of the Fund's common stock by the partnership.

The summary assumes that shareholders will hold the Fund's common stock as capital assets, which generally means as property held for investment. This discussion addresses only the U.S. income tax consequences of an investment by U.S. shareholders, and, therefore, does not address U.S. estate and gift tax rules, U.S. state or local taxation, the alternative minimum tax, excise taxes, transfer taxes or foreign taxes.

For purposes of the following discussion, "U.S. shareholder" is a shareholder that is (i) a citizen or resident of the United States, (ii) a corporation (or other entity taxable as a corporation) created or organized under the laws of the United States or any state thereof or the District of Columbia, (iii) an estate, the income of which is subject to U.S. federal income taxation regardless of its source or (iv) a trust if (a) a U.S. court can exercise primary supervision over the trust's administration and one or more U.S. persons are authorized to control all substantial decisions of the trust or (b) it has a valid election in effect under applicable Treasury regulations to be treated as a U.S. person. A "Non-U.S. shareholder" is a person that is neither a U.S. shareholder nor an entity treated as a partnership for U.S. federal income tax purposes.

The Fund has not requested and will not request an advance ruling from the Internal Revenue Service (the "IRS") as to the federal income tax matters described below. The IRS could adopt positions contrary to those discussed below and such positions could be sustained. In addition, the following discussion applicable to shareholders of the Fund addresses only some of the federal income tax considerations generally affecting investments in the Fund. Shareholders are urged and advised to consult their own tax advisor with respect to the tax consequences of the ownership, purchase and disposition of an investment in the Fund including, but not limited to, the applicability of state, local, foreign and other tax laws affecting the particular shareholder and to possible effects of changes in federal or other tax laws.

On December 22, 2017, new tax legislation was enacted which includes significant changes in tax rates, restrictions on miscellaneous itemized deductions, changes to the dividends received deduction, restrictions on the deduction of interest and the international operations of domestic businesses. Certain changes have sunset provisions, which are important to note. Because the tax legislation is recently enacted and additional guidance is forthcoming, there is still uncertainty in how the legislation will affect the Fund's investments and shareholders and whether such legislation could have an adverse effect on the Fund's investments or the taxation of the shareholders of the Fund. Shareholders are urged and advised to consult their own tax advisor with respect to the impact of this legislation.

GENERAL. The Fund has elected, and intends to continue to qualify each year for, taxation as a RIC under Subchapter M of the IRC. By qualifying as a RIC, the Fund (but not the shareholders) will not be subject to federal income tax on that portion of its investment company taxable income and net realized capital gains that it distributes to its shareholders.

Shareholders should be aware that investments made by the Fund, some of which are described below, may involve complex tax rules some of which may result in income or gain recognition by a shareholder without the concurrent receipt of cash. Although the Fund seeks to avoid significant noncash income, such noncash income could be recognized by the Fund, in which case it may distribute cash derived from other sources in order to meet the minimum distribution requirements described below. Cash to make the required minimum distributions may be obtained from sales proceeds of securities held by the Fund (even if such sales are not advantageous) or, if permitted by its governing documents and other regulatory restrictions, through borrowing the amounts required to be distributed.

QUALIFICATION AS A REGULATED INVESTMENT COMPANY. Qualification as a RIC under the IRC requires, among other things, that the Fund: (a) derive at least 90% of its gross income for each taxable year from (i) dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (ii) net income from certain qualified publicly traded partnerships (together with (i), the "Qualifying Income Requirement"); and (b) diversify its holdings so that, at the close of each quarter of the taxable year: (i) at least 50% of the value of its assets is comprised of cash, cash items (including receivables), U.S. government securities, securities of other RICs and other securities, with those other securities limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of such Fund's total assets and that does not represent more than 10% of the outstanding voting securities of such issuer; and (ii) not more than 25% of the value of its assets is invested in the securities (other than U.S. government securities or securities of other RICs) of any one issuer or the securities (other than the securities of other RICs) of two or more issuers controlled by it and engaged in the same, similar or related trades or businesses, or one or more "qualified publicly traded partnerships" (together with (i) the "Diversification Requirement").

The Treasury Department is authorized to promulgate regulations under which gains from foreign currencies (and options, futures, and forward contracts on foreign currency) would constitute qualifying income for purposes of the Qualifying Income Requirement only if such gains are directly related to the principal business of the Fund in investing in stock or securities or options and futures with respect to stock or securities. To date, no such regulations have been issued.

As a RIC, the Fund generally will not be subject to U.S. federal income tax on the portion of its income and capital gains that it distributes to its shareholders in any taxable year for which it distributes, in compliance with the IRC's timing and other requirements the sum of (i) at least 90% of its investment company taxable income (which includes dividends, taxable interest, taxable original issue discount income, market discount income, income from securities lending, net short-term capital gain in excess of net long-term capital loss, certain net realized foreign currency exchange gains, and any other taxable income other than "net capital gain" as defined below and is reduced by deductible expenses all determined without regard to any deduction for dividends paid); and (ii) 90% of its tax-exempt interest, if any, net of certain expenses allocable thereto ("net tax-exempt interest"). The Fund may retain for investment all or a portion of its "net capital gain" (i.e., the excess of its net long-term capital gain over its net short-term capital loss). If the Fund retains any investment company taxable income or net capital gain, it will be subject to tax at regular corporate rates on the amount retained. If the Fund retains any net capital gain, it may designate the retained amount as undistributed net capital gain in a notice to its shareholders, who will be (i) required to include in income for federal income tax purposes, as long-term capital gain, their shares of such undistributed amount; and (ii) entitled to credit their proportionate shares of tax paid by the Fund against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of the shares owned by a shareholder of the Fund will be increased by the amount of undistributed net capital gain included in the shareholder's gross income and decreased by the federal income tax paid by the Fund on that amount of capital gain.

The qualifying income and asset requirements that must be met under the IRC in order for the Fund to qualify as a RIC, as described above, may limit the extent to which it will be able to engage in derivative transactions. Rules governing the federal income tax aspects of derivatives, including swap agreements, are not entirely clear in certain respects, particularly in light of two IRS revenue rulings issued in 2006. Revenue Ruling 2006-1 held that income from a derivative contract with respect to a commodity index is not qualifying income for a RIC. Subsequently, the IRS issued Revenue Ruling 2006-31 in which it stated that the holding in Revenue Ruling 2006-1 "was not intended to preclude a conclusion that the income from certain instruments (such as certain structured notes) that create a commodity exposure for the holder is qualifying income." In 2016, the IRS issued notice and stated they would not address what constitutes a "security" for purposes of Qualifying Income. In addition, the IRS requested comments as to whether the 2006 Revenue Rulings should be withdrawn. Accordingly, the Fund's ability to invest in commodity related derivative transactions and other derivative transactions may be limited by the Qualifying Income Requirement. The Fund will account for any investments in commodity derivative transactions in a manner it deems to be appropriate; the IRS, however, might not accept such treatment. If the IRS did not accept such treatment, the status of the Fund as a RIC might be jeopardized.

For purposes of the Qualifying Income Requirement described above, all of the net income of a RIC derived from an interest in a qualified publicly traded partnership (generally, defined as a partnership (x) the interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, and (y) that derives less than 90% of its income from the qualifying income described in clause (i) of the Qualifying Income Requirement described above) will be treated as qualifying income. Income derived from a partnership (other than a qualified publicly traded partnership) will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership which would be qualifying income if realized directly by the RIC. In addition, although in general the passive loss rules of the IRC do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership. Under recent legislation, the transferee of a partnership interest generally is required to withhold 10% of the amount realized on the sale or exchange of a partnership interest after December 31, 2017, unless the transferor certifies it is not a foreign person. However, the IRS has delayed this withholding requirement with respect to publicly traded partnerships. It is unclear when and how this withholding requirement will go into effect.

For purposes of the Diversification Requirement described above, the term "outstanding voting securities of such issuer" will include the equity securities of a qualified publicly traded partnership.

If the Fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures to satisfy the Diversification Requirements where the Fund corrects the failure within a specified period of time. If the applicable relief provisions are not available or cannot be met, the Fund will fail to qualify as a RIC and will be subject to tax in the same manner as an ordinary corporation subject to tax on a flat tax rate of 21% and all distributions from earnings and profits (as determined under U.S. federal income tax principles) to its shareholders will be taxable as ordinary dividend income eligible for the dividends-received deduction for corporate shareholders; and either (i) the 20% long-term capital gains tax rate for non-corporate shareholders with taxable income in excess of \$434,000 (\$488,850 if married and filing jointly) or (ii) the 15% long-term capital gains tax rate (0% for non-corporate shareholders in lower income tax brackets) for non-corporate shareholders with taxable income of less than the threshold amounts. If the Fund fails to qualify as a RIC for a period of greater than two taxable years, the Fund generally would be required to recognize any built-in gains with respect to certain of its assets upon a sale of such assets within ten years of qualifying as a RIC in subsequent year.

EXCISE TAX. If the Fund fails to distribute by December 31 of each calendar year an amount equal to the sum of (1) at least 98% of its taxable ordinary income (excluding capital gains and losses) for such year, (2) at least 98.2% of the excess of its capital gains over its capital losses (as adjusted for certain ordinary losses) for the twelve month period ending on October 31 of such year, and (3) all taxable ordinary income and the excess of capital gains over capital losses for the prior year that were not distributed during such year and on which it did not pay federal income tax, the Fund will be subject to a nondeductible 4% excise tax (the “Excise Tax”) on the undistributed amounts. A distribution will be treated as paid on December 31 of the calendar year if it is declared by the Fund in October, November, or December of that year to shareholders of record on a date in such month and paid by it during January of the following year. Such distributions will be taxable to shareholders (other than those not subject to federal income tax) in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received. The Fund intends to actually distribute or be deemed to have distributed substantially all of its net income and gain, if any, by the end of each calendar year in compliance with these requirements so that it will generally not be required to pay the Excise Tax. The Fund may, in certain circumstances, be required to liquidate its investments in order to make sufficient distributions to avoid Excise Tax liability at a time when its Adviser might not otherwise have chosen to do so. Liquidation of investments in such circumstances may affect the ability of the Fund to satisfy the requirements for qualification as a RIC. However, no assurances can be given that the Fund will not be subject to the Excise Tax and, in fact, in certain instances if warranted, the Fund may choose to pay the Excise Tax as opposed to making an additional distribution.

CAPITAL LOSS CARRYFORWARDS. For losses arising from tax years beginning before December 22, 2010, the Fund is permitted to carry forward a net capital loss from any year to offset its capital gains, if any, realized during the eight years following the year of the loss and such capital loss carryforward is treated as a short-term capital loss in the year to which it is carried. For capital losses realized with respect to tax years of the Fund beginning after December 22, 2010, the Fund may carry capital losses forward indefinitely. For capital losses realized in taxable years beginning after December 22, 2010, the excess of the Fund’s net short-term capital losses over its net long-term capital gain is treated as short-term capital losses arising on the first day of the Fund’s next taxable year and the excess of the Fund’s net long-term capital losses over its net short-term capital gain is treated as long-term capital losses arising on the first day of the Fund’s next taxable year. If future capital gains are offset by carried forward capital losses, such future capital gains are not subject to Fund-level federal income taxation, regardless of whether they are distributed to shareholders. Accordingly, the Fund does not expect to distribute any such offsetting capital gains. The Fund cannot carry back or carry forward any net operating losses.

MLPs. The Fund may invest in master limited partnerships which may be treated as qualified publicly traded partnerships. Income from qualified publicly traded partnerships is qualifying income for purposes of the Qualifying Income Requirement, but the Fund’s investment in one or more of such qualified publicly traded partnerships is limited to no more than 25% of the value of the Fund’s assets and must otherwise satisfy the Diversification Requirement. In addition, as discussed above, new tax legislation imposes a 10% withholding tax on the sale or exchange of a partnership interest for transfers after December 31, 2017. However, the IRS has delayed this withholding requirement with respect to publicly traded partnerships. It is unclear when and how this withholding requirement will go into effect.

ORIGINAL ISSUE DISCOUNT AND MARKET DISCOUNT. The Fund may acquire debt securities that are treated as having original issue discount (“OID”) (generally a debt obligation with a purchase price less than its principal amount, such as a zero coupon bond). Generally, the Fund will be required to include the OID in income over the term of the debt security, even though it will not receive cash payments for such OID until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having OID which could affect the character and timing of recognition of income. Inflation-protected bonds generally can be expected to produce OID income as their principal amounts are adjusted upward for inflation. A portion of the OID includible in income with respect to certain high-yield corporate debt securities may be treated as a dividend for federal income tax purposes if the securities are characterized as equity for federal income tax purposes.

A debt security acquired in the secondary market by the Fund may be treated as having market discount if acquired at a price below redemption value or adjusted issue price if issued with original issue discount. Market discount generally is accrued ratably, on a daily basis, over the period from the date of acquisition to the date of maturity even though no cash will be received. Absent an election by the Fund to include the market discount in income as it accrues, gain on its disposition of such an obligation will be treated as ordinary income rather than capital gain to the extent of the accrued market discount. In addition, pay-in-kind securities will give rise to income which is required to be distributed and is taxable even though the Fund receives no interest payments in cash on such securities during the year.

Under recently enacted legislation, for tax years beginning after December 31, 2018, the Fund may be required to include in income certain fees that are treated as OID and required to be included in income for financial statement purposes when received (rather than when accrued into income under current law). It is unclear whether this provision applies to market discount as well.

The Fund generally will be required to make distributions to shareholders representing the income accruing on the debt securities, described above, that is currently includable in income, even though cash representing such income may not have been received by the Fund. Cash to pay these distributions may be obtained from sales proceeds of securities held by the Fund (even if such sales are not advantageous) or, if permitted by the Fund's governing documents, through borrowing the amounts required to be distributed. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would have in the absence of such transactions. Borrowing to fund any distribution also has tax implications, such as potentially creating unrelated business taxable income ("UBTI").

OPTIONS, FUTURES AND FORWARD CONTRACTS. The writing (selling) and purchasing of options and futures contracts and entering into forward currency contracts, involves complex rules that will determine for income tax purposes the amount, character and timing of recognition of the gains and losses the Fund realizes in connection with such transactions.

Gains and losses on the sale, lapse, or other termination of options and futures contracts, options thereon and certain forward contracts (except certain foreign currency options, forward contracts and futures contracts) will generally be treated as capital gains and losses. Some regulated futures contracts, certain foreign currency contracts, and certain non-equity options (such as certain listed options or options on broad based securities indexes) held by the Fund ("Section 1256 contracts"), other than contracts on which it has made a "mixed-straddle election," will be required to be "marked-to-market" for federal income tax purposes, that is, treated as having been sold at their market value on the last day of the Fund's taxable year. These provisions may require the Fund to recognize income or gains without a concurrent receipt of cash. Any gain or loss recognized on actual or deemed sales of Section 1256 contracts will be treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss, although certain foreign currency gains and losses from such contracts may be treated as ordinary income or loss as described below. Transactions that qualify as designated hedges are exempt from the mark-to-market rule, but may require the Fund to defer the recognition of losses on futures contracts, foreign currency contracts and certain options to the extent of any unrecognized gains on related positions held by it.

The tax provisions described above applicable to options, futures and forward contracts may affect the amount, timing, and character of the Fund's distributions to its shareholders. For example, the Section 1256 rules described above may operate to increase the amount the Fund must distribute to satisfy the minimum distribution requirement for the portion treated as short-term capital gain which will be taxable to its shareholders as ordinary income, and to increase the net capital gain it recognizes, without, in either case, increasing the cash available to it. The Fund may elect to exclude certain transactions from the operation of Section 1256, although doing so may have the effect of increasing the relative proportion of net short-term capital gain (taxable as ordinary income) and, thus, increasing the amount of dividends it must distribute. Section 1256 contracts also may be marked-to-market for purposes of the Excise Tax.

When a covered call or put option written (sold) by the Fund expires, the Fund will realize a short-term capital gain equal to the amount of the premium it received for writing the option. When the Fund terminates its obligations under such an option by entering into a closing transaction, it will realize a short-term capital gain (or loss), depending on whether the cost of the closing transaction is less than (or exceeds) the premium received when it wrote the option. When a covered call option written by the Fund is exercised, the Fund will be treated as having sold the underlying security, producing long-term or short-term capital gain or loss, depending upon the holding period of the underlying security and whether the sum of the option price received upon the exercise plus the premium received when it wrote the option is more or less than the basis of the underlying security.

STRADDLES. Section 1092 deals with the taxation of straddles which also may affect the taxation of options in which the Fund may invest. Offsetting positions held by the Fund involving certain derivative instruments, such as options, futures and forward currency contracts, may be considered, for federal income tax purposes, to constitute "straddles." Straddles are defined to include offsetting positions in actively traded personal property. In certain circumstances, the rules governing straddles override or modify the provisions of Section 1256, described above. If the Fund is treated as entering into a straddle and at least one (but not all) of its positions in derivative contracts comprising a part of such straddle is governed by Section 1256, then such straddle could be characterized as a "mixed straddle." The Fund may make one or more elections with respect to mixed straddles. Depending on which election is made, if any, the results with respect to the Fund may differ. Generally, to the extent the straddle rules apply to positions established by the Fund, losses realized by it may be deferred to the extent of unrealized gain in any offsetting positions. Moreover, as a result of the straddle rules, short-term capital loss on straddle positions may be characterized as long-term capital loss, and long-term capital gain may be characterized as short-term capital gain. In addition, the existence of a straddle may affect the holding period of the offsetting positions and cause such sales to be subject to the "wash sale" and "short sale" rules. As a result, the straddle rules could cause distributions that would otherwise constitute "qualified dividend income" to fail to satisfy the applicable holding period requirements, described below, and therefore to be taxed as ordinary income. Further, the Fund may be required to capitalize, rather than deduct currently, any interest expense and carrying charges applicable to a position that is part of a straddle. Because the application of the straddle rules may affect the character and timing of gains and losses from affected straddle positions, the amount which must be distributed to shareholders, and which will be taxed to shareholders as ordinary income or long-term capital gain, may be increased or decreased substantially as compared to the situation where the Fund had not engaged in such transactions.

In circumstances where the Fund has invested in certain pass-through entities, the amount of long-term capital gain that it may recognize from certain derivative transactions with respect to interests in such pass-through entities is limited under the IRC's constructive ownership rules. The amount of long-term capital gain is limited to the amount of such gain the Fund would have had if it directly invested in the pass-through entity during the term of the derivative contract. Any gain in excess of this amount is treated as ordinary income. An interest charge is imposed on the amount of gain that is treated as ordinary income.

SWAPS AND DERIVATIVES. As a result of entering into swap or derivative agreements, the Fund may make or receive periodic net payments. The Fund may also make or receive a payment when a swap or derivative is terminated prior to maturity through an assignment of the swap, derivative or other closing transaction. Periodic net payments will generally constitute ordinary income or deductions, while termination of a swap or derivative will generally result in capital gain or loss (which will be a long-term capital gain or loss if the Fund has been a party to a swap or derivative for more than one year). With respect to certain types of swaps or derivatives, the Fund may be required to currently recognize income or loss with respect to future payments on such swaps or derivatives or may elect under certain circumstances to mark such swaps or derivatives to market annually for tax purposes as ordinary income or loss. The Fund's transactions in swaps or other derivatives may be subject to one or more special tax rules (e.g., notional principal contract, straddle, constructive sales, wash sales and short sale rules). These rules may affect whether gains or losses recognized by the Fund are treated as ordinary or capital or as short-term or long-term, accelerate the recognition of income or gains to the Fund, defer losses to the Fund, and cause adjustments in the holding periods of the Fund's securities. These rules could therefore affect the amount, timing and/or character of distributions to shareholders.

Rules governing the tax aspects of swap or derivative agreements are not entirely clear in certain respects, in particular whether income generated is Qualifying Income. Accordingly, while the Fund intends to account for such transactions in a manner it deems appropriate, the IRS might not accept such treatment. If the IRS did not accept such treatment, the status of the Fund as a RIC might be adversely affected. The Fund intends to monitor developments in this area. Certain requirements that must be met under the IRC in order for the Fund to qualify as a RIC may limit the extent to which the Fund will be able to engage in swap agreements and certain derivatives.

CONSTRUCTIVE SALES. Certain rules may affect the timing and character of gain if the Fund engages in transactions that reduce or eliminate its risk of loss with respect to appreciated financial positions. If the Fund enters into certain transactions (including a short sale, an offsetting notional principal contract, a futures or forward contract, or other transactions identified in Treasury regulations) in property while holding an appreciated financial position in substantially identical property, it will be treated as if it had sold and immediately repurchased the appreciated financial position and will be taxed on any gain (but not loss) from the constructive sale. The character of gain from a constructive sale will depend upon the Fund's holding period in the appreciated financial position. Loss from a constructive sale would be recognized when the position was subsequently disposed of, and its character would depend on the Fund's holding period and the application of various loss deferral provisions of the IRC.

In addition, if the appreciated financial position is itself a short sale or other such contract, acquisition of the underlying property or substantially identical property by the Fund will be deemed a constructive sale. The foregoing will not apply, however, to the Fund's transaction during any taxable year that otherwise would be treated as a constructive sale if the transaction is closed within 30 days after the end of that year and the Fund holds the appreciated financial position unhedged for 60 days after that closing (i.e., at no time during that 60-day period is the Fund's risk of loss regarding the position reduced by reason of certain specified transactions with respect to substantially identical or related property, such as having an option to sell, being contractually obligated to sell, making a short sale or granting an option to buy substantially identical stock or securities).

WASH SALES. The Fund may be impacted in certain circumstances by special rules relating to "wash sales." In general, the wash sale rules prevent the recognition of a loss by the Fund from the disposition of stock or securities at a loss in a case in which identical or substantially identical stock or securities (or an option to acquire such property) is or has been acquired by it within 30 days before or 30 days after the sale.

SHORT SALES. The Fund may make short sales of securities. Short sales may increase the amount of short-term capital gain realized by the Fund, which is taxed as ordinary income when distributed to its shareholders. Short sales also may be subject to the "Constructive Sales" rules, discussed above.

PASSIVE FOREIGN INVESTMENT COMPANIES. The Fund may invest in a non-U.S. corporation, which could be treated as a passive foreign investment company (a "PFIC") or become a PFIC under the IRC. A PFIC is generally defined as a foreign corporation that meets either of the following tests: (1) at least 75% of its gross income for its taxable year is income from passive sources (such as interest, dividends, certain rents and royalties, or capital gains); or (2) an average of at least 50% of its assets produce, or are held for the production of, such passive income. If the Fund acquires any equity interest in a PFIC, the Fund could be subject to federal income tax and interest charges on "excess distributions" received with respect to such PFIC stock or on any gain from the sale of such PFIC stock (collectively "PFIC income"), plus interest thereon even if the Fund distributes the PFIC income as a taxable dividend to its shareholders. The balance of the PFIC income will be included in the Fund's investment company taxable income and, accordingly, will not be taxable to it to the extent it distributes that income to its shareholders. The Fund's distributions of PFIC income, if any, will be taxable as ordinary income even though, absent the application of the PFIC rules, some portion of the distributions may have been classified as capital gain.

The Fund will not be permitted to pass through to its shareholders any credit or deduction for taxes and interest charges incurred with respect to a PFIC. Payment of this tax would therefore reduce the Fund's economic return from its investment in PFIC shares. To the extent the Fund invests in a PFIC, it may elect to treat the PFIC as a "qualified electing fund" ("QEF"), then instead of the tax and interest obligation described above on excess distributions, the Fund would be required to include in income each taxable year its pro rata share of the QEF's annual ordinary earnings and net capital gain. As a result of a QEF election, the Fund would likely have to distribute to its shareholders an amount equal to the QEF's annual ordinary earnings and net capital gain to satisfy the IRC's minimum distribution requirement described herein and avoid imposition of the Excise Tax even if the QEF did not distribute those earnings and gain to the Fund. In most instances it will be very difficult, if not impossible, to make this election because of certain requirements in making the election.

The Fund may elect to "mark-to-market" its stock in any PFIC. "Marking-to-market," in this context, means including in ordinary income each taxable year the excess, if any, of the fair market value of the PFIC stock over the Fund's adjusted basis therein as of the end of that year. Pursuant to the election, the Fund also may deduct (as an ordinary, not capital, loss) the excess, if any, of its adjusted basis in the PFIC stock over the fair market value thereof as of the taxable year-end, but only to the extent of any net mark-to-market gains with respect to that stock it included in income for prior taxable years under the election. The Fund's adjusted basis in its PFIC stock subject to the election would be adjusted to reflect the amounts of income included and deductions taken thereunder. In either case, the Fund may be required to recognize taxable income or gain without the concurrent receipt of cash.

Under proposed regulations, a PFIC is required to distribute income in order for the income to constitute Qualifying Income. Accordingly, the Fund's ability to invest in PFICs may be limited by the Qualifying Income requirement. The Fund will account for any investments in PFICs in a manner it deems to be appropriate; the IRS, however, might not accept such treatment. If the IRS did not accept such treatment, the status of the Fund as a RIC might be jeopardized.

FOREIGN CURRENCY TRANSACTIONS. Foreign currency gains and losses realized by the Fund in connection with certain transactions involving foreign currency-denominated debt instruments, certain options, futures contracts, forward contracts, and similar instruments relating to foreign currency, foreign currencies, and foreign currency-denominated payables and receivables are subject to Section 988 of the IRC, which causes such gains and losses to be treated as ordinary income or loss and may affect the amount and timing of recognition of the Fund's income. In some cases elections may be available that would alter this treatment, but such elections could be detrimental to the Fund by creating current recognition of income without the concurrent recognition of cash. If a foreign currency loss treated as an ordinary loss under Section 988 were to exceed the Fund's investment company taxable income (computed without regard to such loss) for a taxable year the resulting loss would not be deductible by it or its shareholders in future years. The foreign currency income or loss will also increase or decrease the Fund's investment company income distributable to its shareholders.

FOREIGN TAXATION. Income received by the Fund from sources within foreign countries may be subject to foreign withholding and other taxes. Tax conventions between certain countries and the United States may reduce or eliminate such taxes. If more than 50% of the Fund's total assets at the close of any taxable year consist of stock or securities of foreign corporations and it meets the distribution requirements described above, the Fund may file an election (the "pass-through election") with the IRS pursuant to which shareholders of the Fund would be required to (i) include in gross income (in addition to taxable dividends actually received) their pro rata shares of foreign income taxes paid by the Fund even though not actually received by such shareholders; and (ii) treat such respective pro rata portions as foreign income taxes paid by them. The Fund will furnish its shareholders with a written statement providing the amount of the foreign taxes paid by the Fund that will "pass-through" for the year, if any.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. Shareholders may be unable to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund.

Various limitations, including a minimum holding period requirement, apply to limit the credit and deduction for foreign taxes for purposes of regular federal tax and alternative minimum tax. In addition, a shareholder of the Fund may lose the ability to use foreign tax credits passed through by the Fund if the Fund's shares are loaned pursuant to a securities lending agreement.

REITS. The Fund may invest in REITs. Investments in REIT equity securities may require the Fund to accrue and distribute taxable income without the concurrent receipt of cash. To generate sufficient cash to make the requisite distributions, the Fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. The Fund's investments in REIT equity securities may at other times result in its receipt of cash in excess of the REIT's earnings; if the Fund distributes these amounts, these distributions could constitute a return of capital to its shareholders for federal income tax purposes. Dividends received by the Fund from a REIT generally will not constitute qualified dividend income.

The Fund may invest in REITs that hold residual interests in real estate mortgage investment conduits (“REMICs”) or taxable mortgage pools (“TMPs”), or such REITs may themselves constitute TMPs. Under an IRS notice, and Treasury regulations that have yet to be issued but may apply retroactively, a portion of the Fund’s income from a REIT that is attributable to the REIT’s residual interest in a REMIC or a TMP (referred to in the IRC as an “excess inclusion”) will be subject to federal income tax in all events. This notice also provides, and the regulations are expected to provide, that excess inclusion income of a RIC, such as the Fund, will be allocated to shareholders of such RIC in proportion to the dividends received by such shareholders, with the same consequences as if the shareholders held the related REMIC residual interest or invested in the TMP directly. As a result, the Fund may not be a suitable investment for certain tax-exempt-shareholders, including a qualified pension plan, an individual retirement account, a 401(k) plan, a Keogh plan and other tax-exempt entities. See “Tax-Exempt Shareholders.”

Pursuant to proposed regulations on which the Fund may rely, distributions by the Fund to its shareholders that the Fund properly reports as “section 199A dividends,” as defined and subject to certain conditions described below, are treated as qualified REIT dividends in the hands of non-corporate shareholders. Non-corporate shareholders are permitted a federal income tax deduction equal to 20% of qualified REIT dividends received by them, subject to certain limitations. Generally, a “section 199A dividend” is any dividend or portion thereof that is attributable to certain dividends received by a RIC from the REITs it holds, to the extent such dividends are properly reported as such by the RIC in a written notice to its shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. The Fund is permitted to report such part of its dividends as section 199A dividends as are eligible, but is not required to do so.

DISTRIBUTIONS. Distributions paid out of the Fund’s current and accumulated earnings and profits (as determined at the end of the year), whether reinvested in additional shares or paid in cash, are generally taxable and must be reported by each shareholder who is required to file a federal income tax return except in the case of certain tax-exempt shareholders. Distributions in excess of the Fund’s current and accumulated earnings and profits, as computed for federal income tax purposes, will first be treated as a return of capital up to the amount of a shareholder’s tax basis in his or her Fund shares and then as capital gain, assuming the shareholder holds his or her shares as a capital asset. A return of capital is not taxable, but reduces a shareholder’s tax basis in the shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by a shareholder of the Fund’s shares. Distributions are taxable whether shareholders receive them in cash or receive them in additional shares.

For federal income tax purposes, distributions of investment company taxable income are generally taxable as ordinary income, and distributions of gains from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income. Distributions designated by the Fund as “capital gain dividends” (distributions from the excess of net long-term capital gain over short-term capital losses) will be taxable to shareholders as long-term capital gain regardless of the length of time they have held their shares of the Fund. Such dividends do not qualify as dividends for purposes of the dividends received deduction described below.

Non-corporate shareholders of the Fund may be eligible for the long-term capital gain tax rate applicable to distributions of “qualified dividend income” received by such non-corporate shareholders. The long-term capital gains tax rate is 20% for non-corporate shareholders with taxable income in excess of \$434,000 (\$488,850 if married and filing jointly) and 15% (0% for non-corporate shareholders in lower income tax brackets) for non-corporate shareholders with taxable income of less than the threshold amounts. The Fund’s distribution will be treated as qualified dividend income and therefore eligible for the long-term capital gains tax rate to the extent that it receives dividend income from taxable domestic corporations and certain qualified foreign corporations, provided that certain holding periods and other requirements are met. A corporate shareholder of the Fund may be eligible for the dividends received deduction with respect to the Fund’s distributions attributable to dividends received by the Fund from domestic corporations, which, if received directly by the corporate shareholder, would qualify for such a deduction. For eligible corporate shareholders, the dividends received deduction may be subject to certain reductions, and a distribution by the Fund attributable to dividends of a domestic corporation will be eligible for the deduction only if certain holding period and other requirements are met. If the Fund’s shares are loaned pursuant to a securities lending agreement, dividends paid while the shares are held by the borrower may not be qualified dividend income and may not qualify for the dividends received deduction.

Under current law, a 3.8% Medicare contribution tax applies to net investment income including interest (excluding, tax-exempt interest), dividends, and capital gains of U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) and of estates and trusts.

The Fund will furnish a statement to shareholders providing the federal income tax status of its dividends and distributions including the portion of such dividends, if any, that qualifies as long-term capital gain.

Different tax treatment, including penalties on certain excess contributions and deferrals, certain pre-retirement and post-retirement distributions and certain prohibited transactions, is accorded to accounts maintained as qualified retirement plans. Shareholders are urged and advised to consult their own tax advisers for more information.

PURCHASES OF FUND SHARES. Prior to purchasing shares in the Fund, the impact of dividends or distributions which are expected to be or have been declared, but not paid, should be carefully considered. Any dividend or distribution declared shortly after a purchase of shares of the Fund prior to the record date will have the effect of reducing the per share net asset value by the per share amount of the dividend or distribution, and to the extent the distribution consists of the Fund's taxable income, the purchasing shareholder will be taxed on the taxable portion of the dividend or distribution received even though some or all of the amount distributed is effectively a return of capital. This is called "buying a dividend." To avoid "buying a dividend," check the Fund's distribution dates before you invest.

SALES, EXCHANGES OR REDEMPTIONS. Upon the disposition of shares of the Fund (whether by redemption, sale or exchange), a shareholder may realize a capital gain or loss. Such capital gain or loss will be long-term or short-term depending upon the shareholder's holding period for the shares. The capital gain will be long-term if the shares were held for more than 12 months and short-term if held for 12 months or less. If a shareholder sells or exchanges shares of the Fund within 90 days of having acquired such shares and if, before January 31 of the calendar year following the calendar year of the sale or exchange, as a result of having initially acquired those shares, the shareholder subsequently pays a reduced sales charge on a new purchase of shares of the Fund, the sales charge previously incurred in acquiring the Fund's shares generally shall not be taken into account (to the extent the previous sales charges do not exceed the reduction in sales charges on the new purchase) for the purpose of determining the amount of gain or loss on the disposition, but generally will be treated as having been incurred in the new purchase. Any loss realized on a disposition will be disallowed under the "wash sale" rules to the extent that the shares disposed of by the shareholder are replaced by the shareholder within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition. In such a case, the basis of the shares acquired will be adjusted to reflect the disallowed loss. Any loss realized by a shareholder on a disposition of shares held by the shareholder for six months or less will be treated as a long-term capital loss to the extent of any distributions of capital gain dividends received by the shareholder and disallowed to the extent of any distributions of tax-exempt interest dividends received by the shareholder with respect to such shares. Capital losses are generally deductible only against capital gains except that individuals may deduct up to \$3,000 of capital losses against ordinary income.

The 3.8% Medicare contribution tax (applied as described above) will apply to gains from the sale or exchange of shares of the Fund.

BACKUP WITHHOLDING. The Fund generally is required to withhold, and remit to the U.S. Treasury, subject to certain exemptions, an amount equal to 24% of all distributions and redemption proceeds paid or credited to a shareholder of the Fund if (i) the shareholder fails to furnish the Fund with the correct taxpayer identification number ("TIN") certified under penalties of perjury, (ii) the shareholder fails to provide a certified statement that the shareholder is not subject to "backup withholding," or (iii) the IRS or a broker has notified the Fund that the number furnished by the shareholder is incorrect or that the shareholder is subject to backup withholding as a result of failure to report interest or dividend income. If the backup withholding provisions are applicable, any such distributions or proceeds, whether taken in cash or reinvested in shares, will be reduced by the amounts required to be withheld.

Backup withholding is not an additional tax. Any amounts withheld may be credited against a shareholder's U.S. federal income tax liability.

STATE AND LOCAL TAXES. State and local laws often differ from federal income tax laws with respect to the treatment of specific items of income, gain, loss, deduction and credit. **Shareholders are urged and advised to consult their own tax advisers as to the state and local tax rules affecting investments in the Fund.**

NON-U.S. SHAREHOLDERS. Distributions made to non-U.S. shareholders attributable to net investment income generally are subject to U.S. federal income tax withholding at a 30% rate (or such lower rate provided under an applicable income tax treaty). Notwithstanding the foregoing, if a distribution described above is effectively connected with the conduct of a trade or business carried on by a non-U.S. shareholder within the United States (or, if an income tax treaty applies, is attributable to a permanent establishment in the United States), federal income tax withholding and exemptions attributable to foreign persons will not apply. Instead, the distribution will be subject to withholding the highest applicable U.S. tax rate (currently 37% in case of individuals and 21% in the case of corporations) and the non-U.S. shareholders will be subject to the federal income tax reporting requirements generally applicable to U.S. persons described above.

Under U.S. federal tax law, a non-U.S. shareholder is not, in general, subject to federal income tax or withholding tax on capital gains (and is not allowed a deduction for losses) realized on the sale of shares of the Fund, or on capital gains dividends, provided that the Fund obtains a properly completed and signed certificate of foreign status, unless (i) such gains or distributions are effectively connected with the conduct of a trade or business carried on by the non-U.S. shareholder within the United States (or, if an income tax treaty applies, are attributable to a permanent establishment in the United States of the non-U.S. shareholder); (ii) in the case of an individual non-U.S. shareholder, the shareholder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale and certain other conditions are met; or (iii) the shares of the Fund constitute U.S. real property interests ("USRPIs"), as described below.

Under current law, if the Fund is considered to be a “United States Real Property Holding Corporation” (as defined in the IRC and Treasury Regulations), then distributions attributable to certain underlying REIT investments and redemptions proceeds paid to a non-U.S. shareholder that owns at least 5 % of the Fund generally will cause the non-U.S. shareholder to treat such gain or distribution as income effectively connected with a trade or business in the United States, subject such gain or distribution to withholding tax and cause the non U.S. shareholder to be required to file a federal income tax return. In addition, in any year where at least 50% of the Fund’s assets are USRPIs (as defined in the IRC and Treasury Regulations) distributions of the Fund that are attributable to gain from the sale or exchange of shares in USRPIs may be subject to U.S. withholding tax (regardless of such shareholder percentage interest in the Fund) and may require the non-U.S. shareholder to file a U.S. federal income tax return in order to receive a refund (if any) of the withheld amount.

Subject to the additional rules described herein, federal income tax withholding will apply to distributions attributable to dividends and other investment income distributed by the Fund. The federal income tax withholding rate may be reduced (and, in some cases, eliminated) under an applicable tax treaty between the United States and the non-U.S. shareholder’s country of residence or incorporation. In order to qualify for treaty benefits, a non-U.S. shareholder must comply with applicable certification requirements relating to its foreign status (generally by providing the Fund with a properly completed Form W-8BEN). **All non-U.S. shareholders are urged and advised to consult their own tax advisers as to the tax consequences of any investment in the Fund.**

Pursuant to the Foreign Account Tax Compliance Act (“FATCA”), a 30% withholding tax generally is imposed on payments of interest and dividends to (i) foreign financial institutions including non-U.S. investment funds and (ii) certain other foreign entities, unless the foreign financial institution or foreign entity provides the withholding agent with documentation sufficient to show that it is compliant with FATCA (generally by providing the Fund with a properly completed Form W-8BEN or Form W-8BEN-E, as applicable). If the payment is subject to the 30% withholding tax under FATCA, a non-U.S. shareholder will not be subject to the 30% withholding tax described above on the same income. Under proposed regulations, FATCA withholding on the gross proceeds of share redemptions and certain capital gain distributions, scheduled to take effect beginning January 1, 2019, has been eliminated. Such proposed regulations are subject to change.

Shareholders are urged and advised to consult their own tax advisers regarding the application of this new reporting and withholding regime to their own tax situation.

Shareholders are urged and advised to consult their own tax advisers as to the tax consequences of an investment in the Fund.

FOREIGN BANK AND FINANCIAL ACCOUNTS AND FOREIGN FINANCIAL ASSETS REPORTING REQUIREMENTS. A shareholder that owns directly or indirectly more than 50% by vote or value of the Fund, is urged and advised to consult its own tax adviser regarding its filing obligations with respect to IRS Form FinCen114, Report of Foreign Bank and Financial Accounts.

Also, under recently enacted rules, subject to exceptions, individuals (and, to the extent provided in forthcoming future U.S. Treasury regulations, certain domestic entities) must report annually their interests in “specified foreign financial assets” on their U.S. federal income tax returns. It is currently unclear whether and under what circumstances shareholders would be required to report their indirect interests in the Fund’s “specified foreign financial assets” (if any) under these new rules.

Shareholders may be subject to substantial penalties for failure to comply with these reporting requirements.

Shareholders are urged and advised to consult their own tax advisers to determine whether these reporting requirements are applicable to them.

TAX-EXEMPT SHAREHOLDERS. A tax-exempt shareholder could realize UBTI by virtue of its investment in the Fund as a result of the Fund’s investments and if shares in the Fund constitute debt financed property in the hands of the tax-exempt shareholder within the meaning of IRC Section 514(b).

It is possible that a tax-exempt shareholder of the Fund will also recognize UBTI if the Fund recognizes “excess inclusion income” (as described above) derived from direct or indirect investments in REMIC residual interests or TMPs. Furthermore, any investment in a residual interest of a CMO that has elected to be treated as a REMIC can create complex tax consequences, especially if the Fund has state or local governments or other tax-exempt organizations as shareholders.

In addition, special tax consequences apply to charitable remainder trusts (“CRTs”) that invest in RICs that invest directly or indirectly in residual interests in REMICs or in TMPs.

Tax-exempt shareholders are urged and advised to consult their own tax advisers as to the tax consequences of an investment in the Fund.

TAX SHELTER REPORTING REGULATIONS. Under Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders are urged and advised to consult their own tax advisers to determine the applicability of these regulations in light of their individual circumstances.

TAX BASIS INFORMATION. For shares of the Fund that are redeemed, your financial intermediary or the Fund (if a shareholder holds the shares in the Fund direct account) will report gains and losses realized on redemptions of shares for shareholders who are individuals and S corporations purchased after January 1, 2012 to the Internal Revenue Service (IRS). This information will also be reported to a shareholder on Form 1099-B and the IRS each year. In calculating the gain or loss on redemptions of shares, the average cost method will be used to determine the cost basis of the Fund’s shares purchased after January 1, 2012 unless the shareholder instructs the Fund in writing that the shareholder wants to use another available method for cost basis reporting (for example, First In, First Out (FIFO), Last In, First Out (LIFO), Specific Lot Identification (SLID) or High Cost, First Out (HCFO)). If the shareholder designated SLID as the shareholder’s tax cost basis method, the shareholder will also need to designate a secondary cost basis method (Secondary Method). If a Secondary Method is not provided, the Fund will designate FIFO as the Secondary Method and will use the Secondary Method with respect to systematic withdrawals that are made.

A shareholder’s financial intermediary or the Fund (if a shareholder holds the shares in the Fund direct account) is also required to report gains and losses to the IRS in connection with redemptions of shares by S corporations purchased after January 1, 2012. If a shareholder is a corporation and has not instructed the Fund that it is a C corporation in its Account Application or by written instruction, the Fund will treat the shareholder as an S corporation and file a Form 1099-B.

Shareholders are urged and advised to consult their own tax advisers with respect to the tax consequences of an investment in the Fund including, but not limited to, the applicability of state, local, foreign and other tax laws affecting the particular shareholder and to possible effects of changes in federal or other tax laws.

This summary is provided for general information only and should not be considered tax advice or relied on by an investor.

FINANCIAL STATEMENTS

The audited financial statements and notes thereto in the Fund's Annual Report to Shareholders for the fiscal year ended April 30, 2019 (the "Annual Report") are incorporated by reference into this SAI. The information provided for the fiscal year ended April 30, 2019 in the financial statements included in the Annual Report has been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, is included in the Fund's Annual Report and whose report thereon is also incorporated herein by reference. No other parts of the Annual Report are incorporated by reference herein. Copies of the Annual Report may be obtained without charge, upon request, by writing to the Fund at 4400 Computer Drive, Westborough, MA 01581-1722 or calling the Fund at 888-201-5799, or on the Fund's website at www.equitycompass.com.

APPENDIX A

DESCRIPTION OF SECURITIES RATINGS

Moody's Investors Service, Inc. ("Moody's"), Standard & Poor's® ("S&P") and Fitch Ratings, Inc. ("Fitch") are private services that provide ratings of the credit quality of debt obligations. A description of the ratings assigned by Moody's, S&P® and Fitch are provided below. These ratings represent the opinions of these rating services as to the quality of the securities that they undertake to rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. An adviser attempts to discern variations in credit rankings of the rating services and to anticipate changes in credit ranking. However, subsequent to purchase by a fund, an issue of securities may cease to be rated or its rating may be reduced below the minimum rating required for purchase by the fund. In that event, an adviser will consider whether it is in the best interest of a fund to continue to hold the securities.

Moody's credit ratings are current opinions of the relative future credit risk of entities, credit commitments, or debt or debt-like securities. Moody's defines credit risk as the risk that an entity may not meet its contractual, financial obligations as they come due and any estimated financial loss in the event of default or impairment. Credit ratings do not address any other risk, including but not limited to: liquidity risk, market value risk, or price volatility. Credit ratings are not statements of current or historical fact. Credit ratings do not constitute or provide investment or financial advice, and credit ratings are not and do not provide recommendations to purchase, sell, or hold particular securities. Credit ratings do not comment on the suitability of an investment for any particular investor. Moody's issues its credit ratings with the expectation and understanding that each investor will, with due care, make its own study and evaluation of each security that is under consideration for purchase, holding, or sale.

An S&P issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P's view of the obligor's capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Fitch credit ratings relating to issuers provide an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings relating to securities and obligations of an issuer can include a recovery expectation. Fitch credit ratings are used by investors as indications of the likelihood of receiving their money owed to them in accordance with the terms on which they invested. Fitch's credit ratings cover the global spectrum of corporate, sovereign, financial, bank, insurance, and public finance entities (including supranational and sub-national) and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

Short-Term Credit Ratings

Moody's

Ratings assigned on Moody's global short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of a default or impairment.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

"P-1" - Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

"P-2" - Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

"P-3" - Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

"NP" - Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

S&P

S&P's short-term ratings are generally assigned to those obligations considered short-term in the relevant market. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long term ratings.

Dual ratings may be assigned to debt issues that have a put option or demand feature, in which the short-term rating addresses the put feature, in addition to the usual long-term rating.

The following summarizes the rating categories used by S&P for short-term issues:

“A-1” - Obligations are rated in the highest category and indicate that the obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” - Obligations are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

“A-3” - Obligations exhibit adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

“B” - Obligations are regarded as vulnerable and having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” - Obligations are currently vulnerable to nonpayment and are dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation.

“D” - Obligations are in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation is lowered to “D” if it is subject to a distressed exchange offer.

Local Currency and Foreign Currency Ratings - Standard & Poor’s issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer’s foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

Fitch

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may not be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as “short term” based on market convention. Typically, this means up to 13 months for corporate, sovereign and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

The following summarizes the rating categories used by Fitch for short-term obligations:

“F1” — Highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

“F2” — Good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

“F3” — Fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

“B” — Speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

“C” — High short-term default risk. This designation indicates that default is a real possibility.

“RD” — Restricted default. This designation indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

“D” — Default. This designation indicates a broad-based default event for an entity, or the default of a short-term obligation.

Long-Term Credit Ratings

Moody's

Ratings assigned on Moody's global long-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The following summarizes the ratings used by Moody's for long-term debt:

“Aaa” - Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” - Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” - Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” - Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” - Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” - Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” - Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” - Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” - Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from “Aa” through “Caa.” The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a (“hyb”) indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.

S&P

Issue credit ratings are based, in varying degrees, on S&P's analysis of the following considerations:

- Likelihood of payment—capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation, and the promise S&P imputes.
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

The following summarizes the ratings used by S&P for long-term issues:

“AAA” - An obligation rated “AAA” has the highest rating assigned by S&P. The obligor’s capacity to meet its financial commitment on the obligation is extremely strong.

“AA” - An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitment on the obligation is very strong.

“A” - An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitment on the obligation is still strong.

“BBB” - An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Obligations rated “BB,” “B,” “CCC,” “CC,” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

“BB” - An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial or economic conditions which could lead to the obligor’s inadequate capacity to meet its financial commitment on the obligation.

“B” - An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB,” but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitment on the obligation.

“CCC” - An obligation rated “CCC” is currently vulnerable to nonpayment, and is dependent upon favorable business, financial and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

“CC” - An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred, but S&P expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” — An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are higher rated.

“D” - An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

“NR” - This indicates that a rating has not been assigned or is no longer assigned.

Plus (+) or minus (-) - The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

“*Local Currency and Foreign Currency Ratings*” - Standard & Poor’s issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer’s foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

Fitch

Rated entities in a number of sectors, including financial and non-financial corporations, sovereigns and insurance companies and certain sectors within public finance, are generally assigned Issuer Default Ratings (IDRs). IDRs are also assigned to certain entities in global infrastructure and project finance. IDRs opine on an entity’s relative vulnerability to default on financial obligations. The “threshold” default risk addressed by the IDR is generally that of the financial obligations whose non-payment would best reflect the uncured failure of that entity. As such, IDRs also address relative vulnerability to bankruptcy, administrative receivership or similar concepts, although the agency recognizes that issuers may also make pre-emptive and therefore voluntary use of such mechanisms.

In aggregate, IDRs provide an ordinal ranking of issuers based on the agency's view of their relative vulnerability to default, rather than a prediction of a specific percentage likelihood of default. For historical information on the default experience of Fitch-rated issuers, please consult the transition and default performance studies available from the Fitch Ratings website.

The following summarizes long-term IDR categories used by Fitch:

“AAA” — Highest credit quality. “AAA” ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” — Very high credit quality. “AA” ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” — High credit quality. “A” ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” — Good credit quality. “BBB” ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

“BB” — Speculative. “BB” ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial flexibility exists which supports the servicing of financial commitments.

“B” — Highly speculative. “B” ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

“CCC” — Substantial credit risk. “CCC” ratings indicate that default is a real possibility.

“CC” — Very high levels of credit risk. “CC” ratings indicate default of some kind appears probable.

“C” — Near Default. “C” ratings indicate default or default like process has begun, or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a ‘C’ category rating for an issuer include:

- a. the issuer has entered into a grace or cure period following non-payment of a material financial obligation;
- b. the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation; or
- c. the formal announcement by the issuer or their agent of a distressed debt exchange; or
- d. a closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent.

RD” - Restricted default. “RD” ratings indicate an issuer that in Fitch Rating's opinion has experienced;

- a. an uncured payment default on a bond, loan or other material financial obligation but
- b. has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and has not otherwise ceased business. This would include:
 - a. the selective payment default on a specific class or currency of debt;
 - b. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation;

- c. the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; ordinary execution of a distressed debt exchange on one or more material financial obligations.

“D” — Default. “D” ratings indicate an issuer that in Fitch Ratings’ opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, or that has otherwise ceased business.

Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

In all cases, the assignment of a default rating reflects the agency’s opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer’s financial obligations or local commercial practice.

Note: The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” category, or generally to categories below “B.”

Specific limitations relevant to the issuer credit rating scale include:

- The ratings do not predict a specific percentage of default likelihood or failure likelihood over any given time period.
- The ratings do not opine on the market value of any issuer’s securities or stock, or the likelihood that this value may change.
- The ratings do not opine on the liquidity of the issuer’s securities or stock.
- The ratings do not opine on the possible loss severity on an obligation should an issuer default, except in the following cases:
 - Ratings assigned to individual obligations of issuers in corporate finance, banks, non-bank financial institutions, insurance or covered bonds.
 - In limited circumstances for U.S. public finance obligations where Chapter 9 of the Bankruptcy Code provides reliably superior prospects for ultimate recovery to local government obligations that benefit from a statutory lien on revenues or during the pendency of a bankruptcy proceeding under the Code if there is sufficient visibility on potential recovery prospects.
- The ratings do not opine on the suitability of an issuer as a counterparty to trade credit.
- The ratings do not opine on any quality related to an issuer’s business, operational or financial profile other than the agency’s opinion on its relative vulnerability to default.

Ratings assigned by Fitch Ratings articulate an opinion on discrete and specific areas of risk. The above list is not exhaustive.

Municipal Note Ratings

Moody’s

Moody’s uses three rating categories for short-term municipal obligations (U.S. municipal bond anticipation notes of up to five years maturity) that are considered investment grade. These ratings are designated as Municipal Investment Grade (“MIG”) and are divided into three levels - “MIG 1” through “MIG 3”. In addition, those short-term obligations that are of speculative quality are designated “SG”, or speculative grade. MIG ratings expire at the maturity of the obligation.

The following summarizes the ratings used by Moody’s for these short-term obligations:

“MIG 1” - This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG 2” - This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG 3” - This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” - This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

In the case of variable rate demand obligations (“VRDOs”), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody’s evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody’s evaluation of risk associated with the ability to receive purchase price upon demand (“demand feature”). The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade or “VMIG” scale.

“VMIG 1” - This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG 2” - This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG 3” - This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“SG” - This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

S&P

An S&P U.S. municipal note rating reflects S&P’s opinion about the liquidity factors and market access risks unique to notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P’s analysis will review the following considerations:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

“SP-1” - The issuers of these municipal notes exhibit a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” - The issuers of these municipal notes exhibit a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” - The issuers of these municipal notes exhibit speculative capacity to pay principal and interest.

“D” – This rating is assigned upon failure to pay the note when due, completion of a distressed exchange offer, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Fitch

Fitch uses the same ratings for municipal securities as described above for other short-term credit ratings.

APPENDIX B

PROXY VOTING AND CLASS ACTIONS

Policy Version 3.11.2019

Background

In Proxy Voting by Investment Advisers, Investment Advisers Act Release No. 2106 (January 31, 2003), the SEC noted that, “The federal securities laws do not specifically address how an adviser must exercise its proxy voting authority for its clients. Under the Advisers Act, however, an adviser is a fiduciary that owes each of its clients a duty of care and loyalty with respect to all services undertaken on the client’s behalf, including proxy voting. The duty of care requires an adviser with proxy voting authority to monitor corporate events and to vote the proxies.”

Rule 206(4)-6 under the Advisers Act requires each registered investment adviser that exercises proxy voting authority with respect to client securities to:

- Adopt and implement written policies and procedures reasonably designed to ensure that the adviser votes client securities in the clients’ best interests. Such policies and procedures must address the manner in which the adviser will resolve material conflicts of interest that can arise during the proxy voting process;
- Disclose to clients how they may obtain information from the adviser about how the adviser voted with respect to their securities; and
- Describe to clients the adviser’s proxy voting policies and procedures and, upon request, furnish a copy of the policies and procedures.

Additionally, paragraph (c)(2) of Rule 204-2 imposes additional recordkeeping requirements on investment advisers that execute proxy voting authority, as described in the *Maintenance of Books and Records* section of this Manual.

The Advisers Act lacks specific guidance regarding an adviser’s duty to direct clients’ participation in class actions. However, many investment advisers adopt policies and procedures regarding class actions.

Policies and Procedures

Proxy Voting

Proxies are assets of EquityCompass Clients that must be voted with diligence, care, and loyalty. EquityCompass will vote each proxy in accordance with its fiduciary duty to its Clients. EquityCompass will generally seek to vote proxies in a way that maximizes the value of Clients’ assets. However, EquityCompass will document and abide by any specific proxy voting instructions conveyed by a Client with respect to that Client’s securities. Operations coordinates EquityCompass proxy voting process.

Paragraph (c)(ii) of Rule 204-2 under the Advisers Act requires EquityCompass to maintain certain books and records associated with its proxy voting policies and procedures. EquityCompass recordkeeping obligations are described in the *Maintenance of Books and Records* section of this Manual. The CCO or designee will ensure that EquityCompass complies with all applicable recordkeeping requirements associated with proxy voting.

EquityCompass has retained ISS Governance Services (“ISS”) to assist in the proxy voting process. Compliance assists EquityCompass management in the oversight of the relationship with the proxy service provider. EquityCompass monitors ISS to ensure all proxy ballots received are voted according to Clients’ specific instructions and EquityCompass general guidance, and retains all required documentation associated with proxy voting. EquityCompass requires ISS to notify the Company if it experiences a material conflict of interest in the voting of Clients’ proxies.

Absent specific Client instructions, EquityCompass has adopted the following proxy voting procedures designed to ensure that proxies are properly identified and voted, and that any conflicts of interest are addressed appropriately:

- EquityCompass will become aware of specific opportunities to vote proxies by receipt of paper ballots or notification via ISS.
- Absent specific Client instructions, Client proxies shall be voted according to recommendations made ISS’s Standard Benchmark Proxy Voting Guidelines. These guidelines are not exhaustive, do not address all potential voting issues, and do not necessarily correspond to the opinions of EquityCompass Portfolio Management teams. Therefore, there may be instances when EquityCompass may not vote the Client’s shares in accordance with the guidelines.

In the event that EquityCompass believes the recommendations are not in the best interest of the Client or for those matters for which ISS has not provided a voting recommendation, the Portfolio Management team may recommend the voting preference.

- EquityCompass has adopted the ISS Standard Benchmark Proxy Voting Guidelines.
- EquityCompass oversees the proxy voting process. In accordance with ISS guidelines, the proxies are automatically voted, except for the case in which a paper ballot is received. In those instances, EquityCompass will review the issue on the paper ballot and compare it with the ISS guidelines to manually vote the proxy.
- EquityCompass will not neglect its proxy voting responsibilities, but the Company may abstain from voting if it deems that abstaining is in its Clients' best interests. For example, EquityCompass may be unable to vote securities that have been lent by the custodian. Compliance will prepare and maintain memoranda describing the rationale for any instance in which EquityCompass does not vote a Client's proxy.
- ISS will retain the following information in connection with each proxy vote:
 - o The Issuer's name;
 - o The security's ticker symbol or CUSIP, as applicable;
 - o The shareholder meeting date;
 - o The number of shares that EquityCompass voted;
 - o A brief identification of the matter voted on;
 - o Whether the matter was proposed by the Issuer or a security-holder;
 - o Whether EquityCompass cast a vote;
 - o How EquityCompass cast its vote (for the proposal, against the proposal, or abstain); and
 - o Whether EquityCompass cast its vote with or against management.
- EquityCompass will maintain documentation describing the reasons for each vote (e.g., EquityCompass believes that voting with management is in Clients' best interests, but Client X gave specific instructions to vote against management).
- Any attempt to influence the proxy voting process by Issuers or others not identified in these policies and procedures should be promptly reported to the CCO. Similarly, any Client's attempt to influence proxy voting with respect to other Clients' securities should be promptly reported to the CCO.
- Proxies received after a Client terminates its advisory relationship with EquityCompass will not be voted. Such proxies will promptly be returned to the sender, or the custodian, along with a statement indicating that EquityCompass advisory relationship with the Client has terminated, and that future proxies should not be sent to EquityCompass.

Class Actions

EquityCompass does not direct Clients' participation in class actions, as disclosed in Part 2 of Form ADV.

Disclosures to Clients

EquityCompass includes a description of its policies and procedures regarding proxy voting and class actions in Part 2 of Form ADV, along with a statement that Clients can contact Compliance to obtain a copy of these policies and procedures and information about how EquityCompass voted with respect to the Client's securities.

Any request for information about proxy voting should be promptly forwarded to Compliance, which will respond to any such requests.

As a matter of policy, EquityCompass does not disclose how it expects to vote on upcoming proxies. Additionally, EquityCompass does not disclose the way it voted proxies to unaffiliated third parties without a legitimate need to know such information.

Annual and Ongoing Reviews

Compliance will review, no less frequently than annually, the adequacy of the firm's proxy voting policies and procedures to make sure they have been implemented effectively, including whether the policies and procedures continue to be reasonably designed to ensure that proxies are voted in the best interests of clients.

Additionally, Compliance will conduct ongoing due diligence on ISS to ensure they continue to have the capacity and competency to adequately analyze proxy issues on an annual basis.
